DATA SHEET

Remote WorkForce VPN

Experience VPN Security and Connectivity Built for SMBs

Remote WorkForce VPN delivers flexible, cloud-based VPN solutions designed specifically for small and medium businesses. Choose the right level of protection for your customers' needs, from essential internet security to intelligent multi-network access, all with the simplicity and affordability that SMBs require.

Tailored Solutions for Different Business Requirements

Remote WorkForce VPN is available at 2 levels of service, depending on company requirements:

Remote WorkForce
Basic VPN

Encrypts all internet communications. Perfect for businesses that need to protect remote workers without requiring corporate network access.

Remote WorkForce
Enhanced VPN

Supports multiple corporate networks, LANs or cloud-based (AWS/Azure/GCP), with intelligent routing of resource requests directly to the appropriate network. Ideal for distributed environments.

- Implementation in hours, not weeks.
- Simple to upgrade from Basic to Enhanced.
- Clear Glide Path to ZTNA for ultimate Zero Trust security.
- Each user can connect up to 5 devices with unlimited usage. Organizations can have a 30-day trial period at no charge.

Core Features

Complete Internet Encryption - Protect all online communications with industry-standard encryption protocols, securing teams wherever they work.

Intelligent Multi-Network Routing (Enhanced VPN) - Advanced routing engine automatically directs resource requests to the appropriate corporate network (LANs, AWS, Azure, GCP).

Real-Time Malware Protection - Built-in filtering blocks access to known malicious sources, preventing viruses and phishing attacks.

Custom Domain Blocking - Flexible filtering allows administrators to block access to specific websites or categories for policy compliance.

Comprehensive Activity Reporting - Detailed monitoring tracks time on/off the network and user activities, providing visibility that can serve as a proxy for work hours.

Cloud-Based Management Console - Intuitive interface provides complete visibility and control.

Two Service Levels - Choose Basic VPN for essential internet security or Enhanced VPN for multi-network corporate access.

Quick Deployment - Implementation in hours, not weeks. Get teams protected with minimal disruption.

Glide Path to ZTNA - Start with Basic VPN for internet security, upgrade to Enhanced VPN for multi-network access, then have the option to seamlessly transition to full Zero Trust Network Access (ZTNA) when ready. Built on the same platform, each upgrade is simple and non-disruptive, allowing security upgrades as organizations mature, without replacing infrastructure or retraining users.

Multi-Device Support - Each user can connect up to 5 devices with unlimited usage.

Remote WorkForce

Remote WorkForce Basic VPN vs Enhanced VPN

Feature	Remote WorkForce Basic VPN	Remote WorkForce Enhanced VPN
