

HSM protects your patients data

According to the applicable data protection laws, all healthcare facilities such as doctors, hospitals, pharmacies, medical supply stores and health insurers must protect patient data. This also includes the absolutely secure destruction of data that is no longer required.

Do not run any risks and destroy any kind of patient's data on site.

HSM can offer a turn-key solution to ensure you are in compliance!

- ✓ High Security document shredders small/medium/large for medical practice
- ✓ Heavy duty shredding solutions for centralized data destruction
- ✓ Solutions to destroy confidential documents, X-ray films or digital data media

Shred – don't bin it. With HSM document shredders.

Maria T., 38, Doctor:

Why did it have to be me? Prescriptions that had been printed incorrectly were carelessly disposed of in the waste paper basket. Someone fished them out of our paper bin and filled them at the pharmacy. It's the first and last time that happens to me! From now on, all prescriptions and patient records that are no longer needed will go into an HSM document shredder.

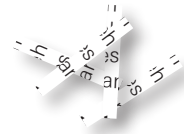

Experts advice

HSM 100% security

With security levels ranging from Level 1 to High NSA-EPL listed and TAA compliant shredders, you will benefit from enhanced security vs. a shred service using Level 1.

Security level P-4
Full-size particle
Sheet in letter format:
more than 370 pieces

Security level P-5
Full-size particle
Sheet in letter format:
more than 7000 pieces
