

Get fast, flexible internet connectivity.

Verizon LTE Business Internet delivers reliable connectivity in as little as three days, almost anywhere you do business in the U.S.

Fast, reliable internet service fuels your business. With Verizon LTE Business Internet, you can connect mission-critical devices without the need for cabling, allowing you to move from floor to floor or space to space with ease. It is available virtually anywhere in the U.S., built with the flexibility, reliability and control you need to keep your business thriving.

LTE Business Internet uses an Arris wireless router with service on our 4G LTE network. Your business gets a reliable, easy-to-install wireless connectivity solution that gets you up and running fast.

Pricing is straightforward. Select from one of three speed tiers on an unlimited data plan and choose whether you buy your router up front or with a device purchase plan.¹ The router is ready right out of the box, and setup is easy – a few simple steps and your business is in business.

Get a wireless internet service that's built to keep your business ready.

Speed Tier Limit (up to)	10 Mbps	25 Mbps	50 Mbps
Premium data threshold (per mo/line)	22 GB	22 GB	22 GB
Network management threshold (Once threshold is exceeded speed tier will be up to 600 Kbps)	50 GB	75 GB	125 GB

After 22 GB/mo/line, your data may be temporarily slower than other traffic during times of congestion.
