

Pixel 4a:

The Helpful Google phone for business

Full of helpful.

- Up to 24-hour Adaptive Battery¹
- 5.8-inch FHD+ OLED screen
- Enterprise-grade Titan M security chip
- 3 years of OS and security updates²
- Help from the new Google Assistant³
- Night Sight, Live HDR+, Super Res Zoom

Pixel 4a - built for every business

Enterprises

Defined as companies with thousands of employees and global operations - that can be variable and be defined by having distinct and layered IT and ITDM roles.

Micro-SMB

These SMBs generally have under 20 employees and look for devices that offer productivity and value. Considerations include that SMB can be highly BYOD driven.

Government & Enterprise

Includes city, county, state, provincial, regional, military, and federal governmental agencies. They make practical decisions based on factors such as ease of integration, strength of security, certifications, and cost of acquisition.

1. Approximate battery life based on a mix of talk, data, standby, and use of other features, with always on display off. An active display and other usage factors will decrease battery life. Pixel 4a battery testing conducted in Mountain View, California in early 2020 on pre-production hardware and software. Actual results may vary.

2. Android version updates for at least 3 years from when the device first became available on the Google Store in the US. See g.co/pixel/updates for details.

3. English only. See g.co/pixelassistant/languages for country and language availability and Google Account requirements

Google Pixel 4a Key Features

Security built in

With Pixel 4a, you'll have the latest innovations in device security from Google's hardware and software, like automatic updates¹ and the Titan M security chip. So you can focus on what matters.

- **Anti-malware and anti-phishing.**

Pixel comes with Google Play Protect, Google's built-in malware protection for all the apps on your phone. It scans over 100 billion apps every day to help keep your phone safe. Pixel also has built-in anti-phishing protections that scan and notify users of potential threats coming in from phone calls, text messages, emails, and links sent through other apps

- **Secure processing.**

Our enterprise-grade Titan M security chip offers hardware-based protection for Google devices like Pixel 4a. It's tamper resistant and designed to help secure and safeguard the OS and sensitive work or data on your phone (like your password).

Strong device management

Create an excellent working environment on Pixel 4a with intuitive features that make setup easy, and ongoing enterprise management seamless.

- **Easy device deployment.**

Deploy corporate-owned devices in bulk using zero-touch enrollment without having to manually set up each device. Just open the box, and Pixel 4a is ready to go with management, apps, and configurations all set, reducing the need for initial support.

- **Application management control.**

Select, purchase, and manage apps for your organization with Managed Google Play. And decide what apps can be installed on corporate devices.

Unparalleled value and helpfulness

Pixel 4a helps your employees manage any task at hand. And with the best of Google's technology, software, and innovation, it gets even better over time.

- **Battery power when you need it.**

Pixel 4a's Adaptive Battery learns your favorite apps and reduces power to the ones you rarely use. This limits background battery usage and helps your phone last up to 24 hours.² And with a fast-charge battery and charger in-box, you can get back to work fast.³

- **No more spam calls.**

With our latest update to Call Screen, you won't be interrupted by robocalls. Google Assistant now helps you automatically screen unknown callers and filter out robocalls before your phone ever rings. And when it's a real person, your phone will ring a few moments later with helpful context about who's calling and why.⁴

1. Android version updates for at least 3 years from when the device first became available on the Google Store in the U.S. See g.co/pixel/updatesfordetails.

2. Approximate battery life based on a mix of talk, data, standby, and use of other features, with always on display on. An active display and other usage factors will decrease battery life.

Pixel 4a battery testing conducted in Mountain View, California in early 2020 on pre-production hardware and software. Actual results may vary.

3. Charging rates are based upon use of the included charger plugged into a wall outlet. Actual results may vary.

4. US only. English only. Call Screen may not detect all robocalls or spam calls.

Why SYNEX?

As a distributor of Google Hardware devices, SYNEX is leading the charge in the solutions Google brings to the market. From pre-sales assessments to post-sale support, our dedicated team can support all of your Google needs and helps you provide the full solution. SYNEX is proud to be the exclusive enterprise distributor of Google Hardware products.

To learn more about the new Pixel 4a, contact a SYNEX representative at GoogleHW@synex.com.
