Help educators and administrators thrive in Education

Key Processes | Before AI

Using AI

Personalize learning
It's often not feasible to create personalized materials to meet student needs

Assessment formulation
Use Copilot to help create differentiated tests based on student abilities and save time to focus on other tasks.

Materials creation
Developing content and regularly adapting it based on feedback or requirements is time intensive

Efficient policy drafting
Research best practices and requirements, draft policies, and cocreate with faculty and staff.

Dynamic course orchestration
Use Copilot to create engaging, standards aligned materials and adapt them based on feedback

Plan and collaborate
Aligning large groups and effectively collaborating is difficult

Workforce Planning
Develop a comprehensive communication strategy to determine communication channels, timelines, and messaging for effective engagement.

Operational efficiency
Lack of efficient planning and maintenance can cause larger issues such as financial impact

Agile budget management
Ensure continuous adjustments to the budget models, reflecting the most recent financial figures and areas for cost optimization for various stakeholders.

Gain insights
Discovering, sharing, and actioning on insights is challenging, whether from multiple data sources or in meetings

District-wide reporting and communication
Analyze key data, prepare customized reports, and share them effectively

Monthly board meeting management
Save time on meeting preparation and follow-up, lead interactive meetings
