

Surface and AI

What's the difference between a CPU, GPU and NPU?

CPU
Central Processing Unit

- Brain of the computer
- Performs basic operations from software instructions, loaded from memory

GPU
Graphics Processing Unit

- Specialized to render 2D and 3D objects
- Can perform operations in parallel, processing vectors of data simultaneously

NPU
Neural Processing Unit
Element of System on Chip (SoC)

- Specific architecture for deep learning
- Integrated as an element of the SoC
- Hardwired matrix without need for memory access, reduced precision
- Trained specifics, Inference operations

Pros Can execute any line of software

Efficient for repeatable calculations

Audio, Video, Data inspection

Neg Not efficient at specific operations

Floating Point, not needed for AI

Generic code execution

CPU
Scalar
Numbers

$$\begin{matrix} 3 \\ \otimes \\ 2 \\ = \\ 6 \end{matrix}$$

GPU
Vector
Array of Numbers

$$\begin{matrix} 3 \\ 0 \\ 9 \\ \otimes \\ \begin{matrix} 1 \\ 2 \\ 5 \end{matrix} \\ = \\ \begin{matrix} 3 \\ 0 \\ 45 \end{matrix} \end{matrix}$$

also operations like vector dot product

NPU
Tensors
Array of Numbers

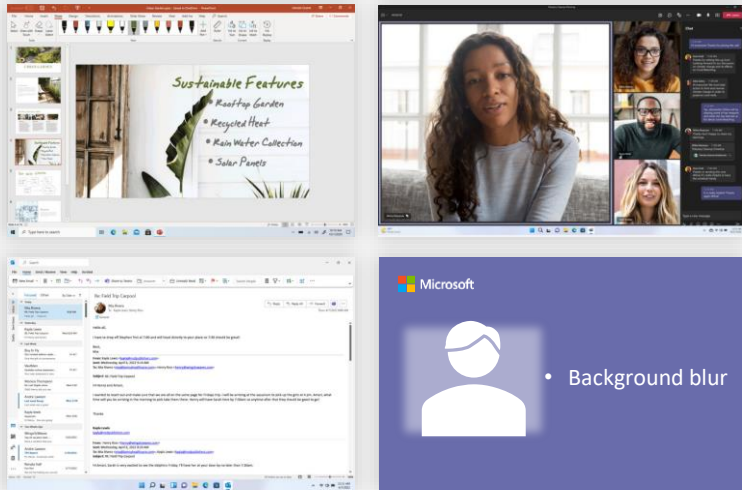

$$\begin{matrix} 4 & 3 & 6 \\ 7 & 0 & 3 \\ 1 & 8 & 2 \\ \otimes \\ \begin{matrix} 1 & 3 & 2 \\ 2 & 0 & 3 \\ 1 & 4 & 2 \end{matrix} \\ = \\ \begin{matrix} 4 & 9 & 12 \\ 28 & 0 & 9 \\ 1 & 32 & 4 \end{matrix} \end{matrix}$$

also operations like vector dot product

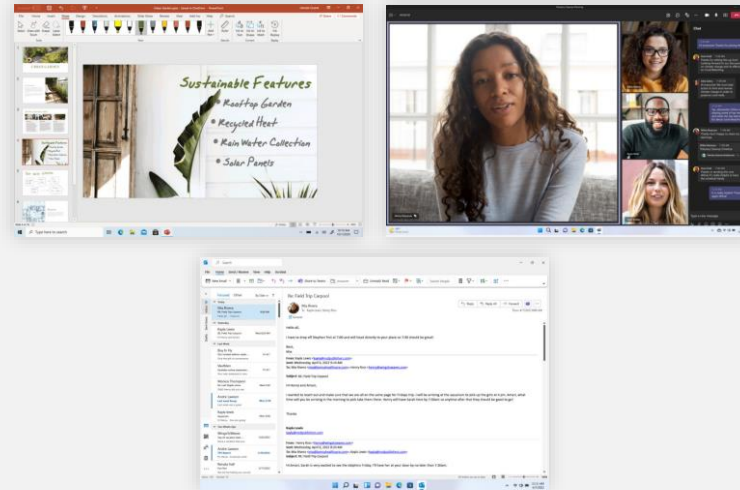

Free your CPU and gain powerful NPU-enabled AI experiences

Without NPU

- PowerPoint presentation
- Outlook
- Teams call
- AI video processing

With NPU

- PowerPoint presentation
- Outlook
- Teams call

AI video/audio processing workload on NPU

-
- Automatic framing
 - Portrait blur
 - Eye contact
 - Voice focus
 - Live captions

Concurrently run AI features on Surface Pro 9 with 5G

 Automatic framing

 Portrait blur

 Eye contact

 Voice focus

 Live Captions

15 Trillion Operations per second (15 TOPS)

Surface Pro 9 with 5G Microsoft SQ[®] 3's Neural engine

Better background blur with NPU

CPU background blur

Background blur with NPU
(Surface Pro 9 5G)

As we look to the future of computing

Arm SoC—All in one, with a powerful CPU, NPU, mobile network, and much more

Next-gen CPU

Designed to deliver great power efficiency

Performance

Arm devices provides great performance on device

AI engine

NPU processor with best inference performance

5G

World's best modem-RF system with superior energy efficiency

Wi-Fi and Bluetooth location scanning

Comprehensive connectivity

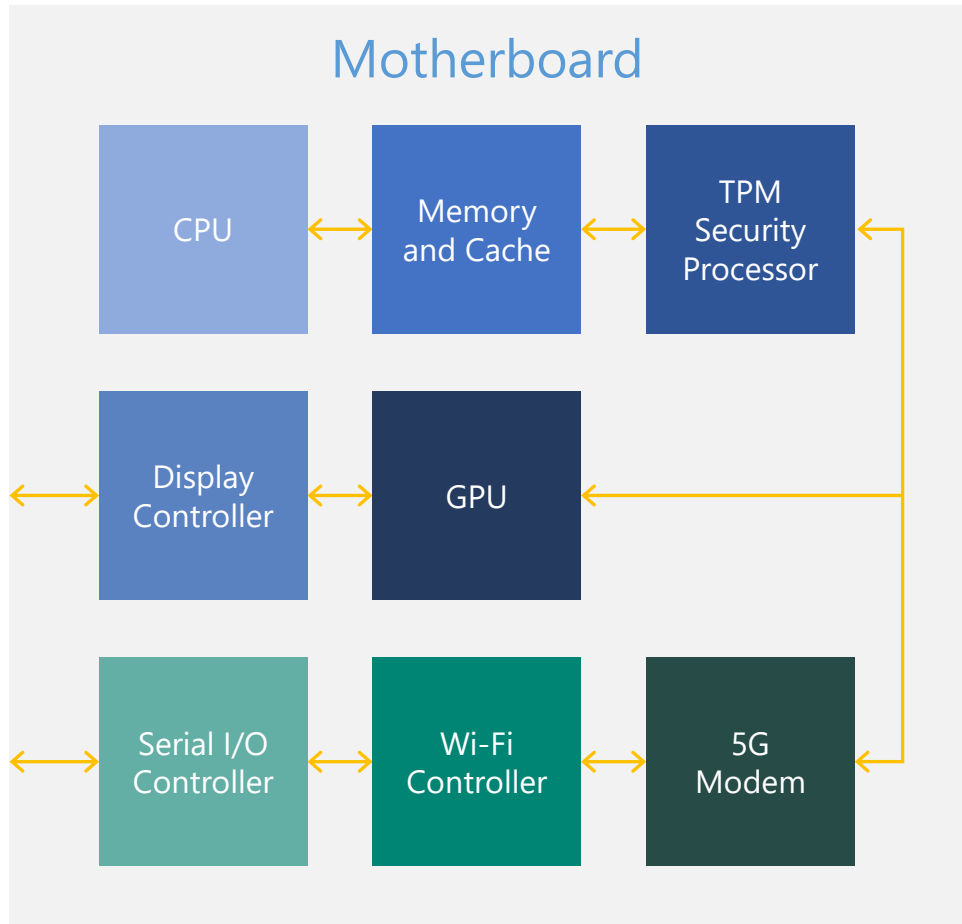

Camera and audio

Leading image quality and advanced audio features

Display and video

Best-in-class picture quality

System on Chip (SoC) – Motherboard to SoC

Microsoft Pluton Security Processor

The security chip designed for the future of Windows PCs

Available on Surface Pro 9 with 5G devices, Pluton puts secure crypto-processor security measures directly into the CPU, removing the potential communication CPU to TPM bus interface vulnerability.

- Hardware-based root of trust
- Secure identity
- Chip-to-cloud
- A specialized NPU for Security Processing
