

Is Your Hospitality Network Ready?

How To Use

Select one response for each statement. The goal is not a numerical score - it is to uncover uncertainty, risk and priorities for a deeper network review.

Guest expectations, connected services and operational demands continue to rise. Use this quick assessment to identify strengths, gaps and areas that deserve a closer look.

Readiness statement	Yes	Needs attention	Not sure
GUEST EXPERIENCE AND WI-FI			
Guests can stream, make video calls and use mobile services reliably across the property.	☐	☐	☐
IT can see actual application experience instead of relying only on infrastructure status.	☐	☐	☐
BANDWIDTH AND CONGESTION			
The team knows which applications, users and devices consume capacity during peak periods.	☐	☐	☐
Critical guest and hotel services can be prioritized dynamically when congestion occurs.	☐	☐	☐
VISIBILITY AND TROUBLESHOOTING			
Issues can be isolated in real time by property, location, application, user or device.	☐	☐	☐
Central IT or the MSP can resolve many problems remotely before guests complain.	☐	☐	☐
SLAS AND SERVICE DELIVERY			
Service availability, QoE, detection and resolution performance can be measured and reported.	☐	☐	☐
The team can identify congestion-driven SLA risk before it becomes a customer-impacting event.	☐	☐	☐
SECURITY AND ACCEPTABLE USE			
The network can identify threats and anomalies from guest, BYOD and connected devices.	☐	☐	☐
Application, category or content policies can be enforced with user and location context.	☐	☐	☐
SERVICE FLEXIBILITY AND GROWTH			
Tiered plans, quotas and policies can be tailored for guests, groups, meetings or events.	☐	☐	☐
Usage insight helps identify higher-value plans, upgrades and new service opportunities.	☐	☐	☐

WHAT READINESS LOOKS LIKE

A ready hospitality network can see experience in context, adapt traffic as demand changes, protect critical services, prove performance and support flexible service offerings.

THE BOTTOM LINE

AppLogic Networks transforms hospitality networks into intelligent, high-performance platforms that improve guest experiences, reduce operating costs, and strengthen recurring revenue.

Analyze. Optimize. Monetize. Secure.
