

Reliable Backup Power Whenever You Need It

APC Smart-UPS™: 120V single-phase UPS solutions

Smart-UPS provide intelligent and efficient network power protection with options from entry-level to extended runtime. There's a Smart-UPS model for nearly every application and budget.

Remote monitoring and management

Smart-UPS are connected solutions, so you can securely monitor and manage them from the Schneider Electric platform (as part of EcoStruxure™) or the application that best suits your needs.

Broad range of power options

Smart-UPS Line Interactive VRLA models are available from 450VA to 3000VA.

Options for a variety of applications

Protect essential equipment from the data center to the server room to edge and back-office environments.

Smart-UPS

Line interactive VRLA for reliable backup power with lead acid batteries

Lithium-ion models for line interactive power protection with 3x the battery life and lower TCO

Smart-UPS Ultra for ultra-high density on-line power protection in a small, light size from 1U to 4U

Smart-UPS Modular Ultra that grows with IT demands (add power or battery modules)

Services for peace of mind

Purchase Schneider Electric services to manage your UPS lifecycle, including (where available) installation, monitoring and management, and end-of-life recycling.
