

AddOn Product Overview

Founded in 1999, AddOn Networks is a global leader in optical connectivity and high-speed infrastructure solutions. We support enterprises, service providers, hyper-scale data centers, and AI-driven environments with fully compatible transceivers and interconnect solutions ranging from 1G to 1.6T.

Every product is engineered and validated in our advanced in-house labs to ensure seamless interoperability and real-world network performance. Rather than relying solely on specification-based testing, we conduct rigorous compatibility and functional validation across supported OEM platforms.

Backed by a lifetime warranty and 24/7/365 global engineering support, AddOn delivers OEM-level performance and reliability – at a fraction of the cost.

Transceivers

Scalable, high-performance transceivers built for enterprises, data centers, and AI-driven environments. Our portfolio spans 1G to 1.6T, including 400G, 800G, and next-generation OSFP224 solutions designed for ultra-high-density, low-latency deployments.

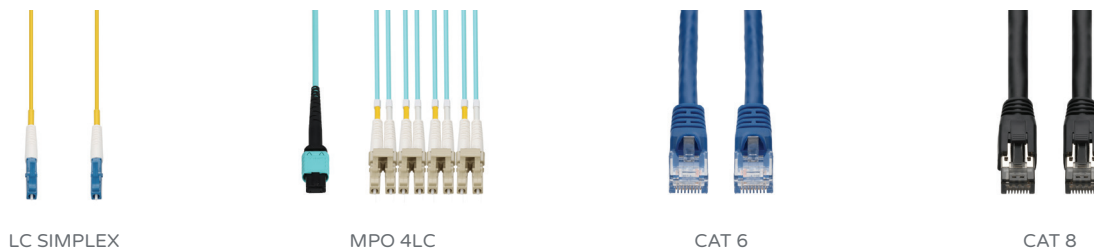

High-Speed Cabling

High-speed interconnect solutions including DACs, AECs, and AOCs support short and long-reach connectivity across any data center environment. Available in copper and fiber options with active and passive configurations to fit any deployment.

Patch Cables

Patch cables span LC to MPO fiber configurations across single-mode and multimode options, as well as CAT 6 and CAT 8 copper ethernet cables, all engineered to meet rigorous quality and compliance standards.

Memory

Fully compatible, application-tested memory solutions designed for servers, switches, laptops, and workstations across leading enterprise platforms.

OEM Blade Server Memory

Desktop Memory

Laptop Memory

Media Converters

Media converters provide copper-to-fiber and fiber-to-fiber connectivity, offering a cost effective solution for extending network reach without compromising performance or reliability.

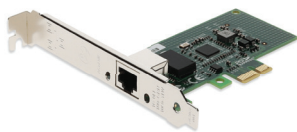

1000Base MM to SM Media

1000Base-BX ST to RJ45 Media

Network Interface Cards

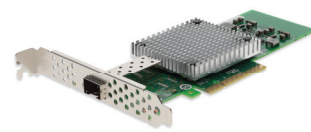

Enterprise-grade network interface cards (NICs) distribute traffic efficiently across multi-processor environments to maximize throughput and reduce bottlenecks.

1000-Base PCI 1RJ45 Card

10G-Base PCIe 2 RJ45 Card

10G-Base PCIe 1 Open SFP+ Card

Accessories

Our connectivity accessories are engineered for modern enterprise and hybrid work environments. This portfolio includes USB-C adapters, HDMI and DisplayPort solutions, audio/video converters, and essential cabling for seamless device integration and consistent performance.

USB-C Cable

DisplayPort to HDMI Adapter Converter

DisplayPort Cable

HDMI to Mini-HDMI Cable

Power Adapters

OEM-compatible charging solutions designed to deliver consistent and reliable power across supported laptop and mobile platforms.

Laptop Power Adapters

Privacy Screens

Designed for professionals in open or high-traffic environments, our privacy screens reduce side-angle visibility and eye strain while supporting a full range of laptop and monitor sizes for both PC and Mac.

Privacy Screen for Laptops

Privacy Screen for Monitors

About AddOn Networks

AddOn Networks, an Amphenol company, is the global leader in optical connectivity solutions serving data center, enterprise, government, education, and healthcare provider networks.

It operates in over 25 countries through its long-standing commercial channels to provide continuity of supply and world-class service.

AddOn offers a full network catalog of optical transceivers and high-speed cabling which are 100% compatible in form and functionality across 100 OEM manufacturers, covering more than 20,000 systems and platforms. Its certified solutions are backed by a lifetime warranty and 24/7/365 global field engineering support.
