Retail Proof of Concept (PoC) Bundles

Retail isn't just a "grab-it-and-go" kind of experience anymore. To stay competitive in an online-enabled world, retail storefronts are becoming a flexible hub for product delivery and engagement. However, this flexibility requires a lot of alterations to the traditional retail business model:

Customers expect a top-class retail experience with minimal waiting and maximum engagement.

Real-time inventory management is vital, but many retail systems are delayed and prone to errors.

Retail clerks need a flexible point of sale (POS) system that helps them move quickly through their day.

To meet these challenges, choose an Apple PoC bundle made exclusively for retail:
