

HP ScanJet Enterprise Flow N6600fnw1

BLI 2023 Pick Award

The HP ScanJet Enterprise Flow N6600fnw1 has won a Buyers Lab (BLI) 2023 Pick Award from Keypoint Intelligence thanks to its...

- Business process automation capabilities like zonal OCR, barcode recognition, and document classification
- Data governance features, including automated file naming and routing as well as document redaction
- Simple user experience through its customizable colour touchscreen display

“The HP ScanJet Enterprise Flow N6600fnw1 comes with an impressive portfolio of workflow automation features that help businesses get the most out of their document digitization strategy,” said Lee Davis, Senior Analyst in Keypoint Intelligence’s Office Group. “Users can create preconfigured workflows to handle everything from batch separation and data extraction to file naming and routing. Not only does this help workers focus on what is most important, but it also prevents little mistakes from leading to big problems.”

Powered by HP Scan Premium, the HP ScanJet Enterprise Flow N6600fnw1 enables businesses to automate workflows and improve data governance and information security. Zonal OCR and barcode recognition capabilities can be used to auto-extract specific information from a document—an invoice or a SKU, for instance—and route it to where it is needed next. Meanwhile, automated file naming ensures that document names always adhere to company conventions, while redaction capabilities protect sensitive information at the point of capture.

“Overall, the HP ScanJet Enterprise Flow N6600fnw1 Scanner was impressive during Keypoint Intelligence’s lab testing, but there were two areas that we found particularly impressive,” said Len Wolak, Senior Lab Technician at Keypoint Intelligence. “First, the device offers outstanding OCR accuracy, as it scored at least 90% accuracy in five of the eight OCR tests

we ran—this is superior to most devices in its class. Second, the HP ScanJet Enterprise Flow N6600fnw1 is incredibly easy use. Between the preconfigured scan profiles and easy walk up user experience at the customizable colour touchscreen, operating the device is as simple as loading paper, hitting a button, and waiting for the device to finish scanning.”

About Keypoint Intelligence

For over 60 years, clients in the digital imaging industry have relied on [Keypoint Intelligence](#) for independent hands-on testing, lab data, and extensive market research to drive their product and sales success. Keypoint Intelligence has been recognized as the industry’s most trusted resource for unbiased information, analysis, and awards due to decades of analyst experience. Customers have harnessed this mission-critical knowledge for strategic decision-making, daily sales enablement, and operational excellence to improve business goals and increase bottom lines. With a central focus on clients, Keypoint Intelligence continues to evolve as the industry changes by expanding offerings and updating methods, while intimately understanding and serving manufacturers’, channels’, and their customers’ transformation in the digital printing and imaging sector.

About BLI Office Hardware Pick Awards

Buyers Lab Picks stand alone in the industry and are hard-earned awards as they are based on rigorous testing, including an extensive durability assessment and evaluation of key attributes such as usability, image quality, and value. Each product that passes its lab test earns the Highly Recommended or Recommended Seal and a Certificate of Reliability, with the best performers qualifying as Pick contenders.
