Aruba Instant On. For small business.

Wired and wireless solutions for a competitive edge.

Small businesses come in all shapes and sizes. From boutique clothing stores and hotels to gourmet cafés — even tech start-ups.

Crystal-clear audiovisuals. Seamless conferencing. Secure transactions. These aren't just nice-to-haves — they're make-or-break functions for organizations of every size.

These functions are essential in creating a frictionless network experience. They keep employees engaged and performing at their best. They enable you to meet your customers where they're at. They can be a game-changer for your business.

Aruba Instant On can provide you with the network you need to win.

The in-store experience.

For retailers, network connectivity and security are critical for operations. Providing fluid Point-of-Sale (PoS) systems, payroll, inventory control, and guest access is a must for growing businesses. The in-store network is vital to staff and shoppers alike — just watch what happens when it stops working.

The Aruba Instant On AP11, 1930 8-port switches and 1960 24-port switches are perfect for the small boutique, real estate office, or a promising dental practice. You get a cost-effective, easy-to-manage Wi-Fi solution that's built to support the mobile, IoT, and security demands of today's busy commercial environment. The Aruba Instant On 1930 switches are perfect for powering devices like surveillance cameras and PoS terminals.

Using interactive digital signage to connect with your customers? The Aruba Instant On 1960 24-port switches ensure that you get high-performance connectivity for media servers that connect IPTV and digital signs.

Want to build brand awareness with exclusive deals and ads? Instant On supports internal, external and Facebook Wi-Fi captive portals to provide open or password-protected access to your business's Wi-Fi hotspot.

A welcoming experience, every time.

Whether your run a small B&B or the hottest boutique hotel in town, we understand the guest and staff experience drives your need for fast, secure, and reliable network access. And all it takes is a slow network connection or poor Wi-Fi coverage to knock a review from five to four stars or worse. The Aruba Instant On AP11D, AP12, AP22 and AP17 are great for spaces that require seamless indoor and outdoor access, and provide coverage to ensure smooth in-room Wi-Fi. The Instant On 1930 24- and 48-port switches are ideal for powering devices like surveillance cameras, wireless access points, and smart door locks. The new Wi-Fi Certified 6™ AP22 access points deliver even faster Wi-Fi speeds and greater capacity for a superior Wi-Fi experience.

You get a robust and cost-effective networking solution that's built to keep your staff and guests happy. And better yet, simple software tuning ensures everything from Netflix to security cameras to key operational systems can work together in perfect harmony.

For businesses that occupy multiple floors and use multiple access points, pan-tilt zoom cameras and IPTV, the Aruba Instant On 1960 stackable switches come with 10G uplink ports to ensure reliable wired connectivity. What's more, you'll save on cabling costs — our Smart Mesh technology allows you to extend your Wi-Fi network to hard-to-wire areas.

It's your office, it has to work.

When starting out, you're faced with thousands of decisions that are all competing for your time. Luckily, you've laid the ground-work for success with high performance laptops, interactive voice and video collaboration tools, and a wireless network that can handle whatever device you throw at it.

Did we just describe your business? Then the Aruba Instant On AP15 and AP22 access points and Instant On 1930 24- or 48-port switches are for you. These switches offer the fastest connectivity available to eliminate bottlenecks.

Does your business operate on multiple floors? Need to connect servers and storage devices? The Aruba Instant On stackable 1960 switches enable high-speed connectivity by aggregating switches, wherever they are, to create a high-performance network that ensures speedy access to critical applications.

That fast connectivity means that no matter how many devices you have on the network, your employees stay produc-tive. And built-in security features mean that your business data is safe, giving you that much-needed peace of mind.

Wired and Wi-Fi for that WFH life.

Whether you're running video conference calls or streaming videos for your kids, you need a reliable network. The Aruba Instant On AP11 and AP12 combined with the 8-port Instant On 1930 switch works great at home, offering business-grade connectivity that consumer networking solutions can't.

The Instant On solution prioritizes business-critical applications, so your work apps come first. The solution also comes with an integrated firewall to keep you and your family's personal information, devices, and network protected from online threats.

Secure and reliable connectivity for staff and patients.

As healthcare facilities increasingly adopt telehealth, mobile sites, and drive-thru testing, the network becomes even more critical to ensure that patient care and communications remain uninterrupted. And the network not only needs to be reliable — it has to be secure to comply with regulatory standards and to protect against hackers. The Aruba Instant On AP22, AP15, and AP17 provide secure and seamless Wi-Fi connectivity both indoors and outdoors, and are certified to work with medical devices without causing interference.

Aruba Instant On 1930 and 1960 switches provide PoE support to power mission-critical devices like biometric sensors, VoIP phones, LED smart lights, and CCTV surveillance cameras in addition to wireless AP's. And for applications that require high resolution such as medical imaging, the 1960 48-port model uses 10G connectivity to provide the bandwidth necessary to deliver crystal clear images and video.

1960 48G 2XGT 2SFP+   AP15   AP22   AP17

Blazing fast connectivity for today's smart classrooms.

Connecting students and teachers for a consistent learning experience no matter where they are or what device they are using is of paramount importance for independent schools and training facilities. To deliver an optimal learning experience, whether in the classroom or remotely, connectivity is key — and that connection needs to be fast, secure, and affordable. As technology continues to transform education with the increased use of data-hungry applications, video and gamification technologies, the role of the network becomes even more critical. Aruba Instant On AP22, AP15, and AP17 provide high-performance Wi-Fi coverage both indoors and outdoors to keep students and teachers connected.

And to ensure that teachers and students can easily access online labs and assignments, Aruba Instant On 1960 switches provide seamless connectivity to APs and surveillance cameras with 10G uplinks that deliver the higher bandwidth needed for video clarity and high-speed connectivity to campus portals and online coursework.

These smart switches also power smart lighting, security cameras, printers and interactive projectors, all of which can be managed through a single interface.

Why Aruba Instant On

To remain competitive in today's digital world, small businesses are deploying innovative solutions that create value, reduce costs, mitigate risks, and build customer confidence — just like larger companies. Your network should be the least of your worries.

With Aruba Instant On, you get blazing-fast performance, enhanced security and simple set up and management. And what's even better, you're getting premium hardware and software that's scalable to support future expansion — all at a cost that won't break the bank.
