B

READY

Multiple methods for integration with leading CMS software are available for a truly CMS-agnostic platform.

From corporate messaging to retail promotion, the B Series powers a wide range of dynamic digital experiences designed to inform, engage, and inspire audiences.

B
SERIES

The Avocor B Series delivers reliable, high-impact digital signage across industries, adapting effortlessly to the unique demands of each environment.

1. Enterprise & Corporate

Deliver consistent, dynamic workplace communications across headquarters, campuses, and distributed offices.

2. Education

Enhance learning environments with reliable wayfinding, announcements, safety notices, timetables and event updates.

3. Retail & Hospitality

Create eye-catching promotions, menu boards, and branded content that performs in bright, high-traffic spaces.

4. Government & Public Sector

Communicate clearly with ADA-compliant displays that support secure, centrally managed deployments.

5. Healthcare

Share patient information, public updates, or operational messaging with secure, high-reliability signage.

6. Transportation

Provide real-time flight and service updates, advertising, wayfinding and safety alerts, all supported by 24/7 reliability.

SERIES

Welcome to a world of options

The B Series isn't just another display. It's your canvas, built to adapt to whatever you throw at it. From compact 43" screens to sprawling 86" panels, these displays fit just about any space or vision. Mount them portrait or landscape, run them non-stop, 24 hours a day, they're ready for anything. And with seven different ways to load your content, the B Series is as versatile as you need it to be.

B. FLEXIBLE

Take control of your content

With the Avocor B Series, you're never boxed in. Choose from seven flexible options to load and manage your content. Whether you're plugging in a media player or syncing up with your go-to content management system. No restrictions, no complicated workarounds. Just a display that works the way you do.

B. CONNECTED

1. Deployment via Avocor FUSE DMS

Upload a CMS APK into FUSE, Avocor's free cloud-based MDM, and deploy it directly to the B Series SoC, providing remote management, status monitoring, usage analytics and app control.

2. OPS MDEP (Microsoft)

For organizations standardizing on Microsoft environments and managing MDEP ecosystems.

3. OPS Windows 11/ Windows IoT

Operate and manage the Avocor B Series display like a Windows 11 or Windows IoT device with access to Microsoft 365, Windows-based executables, and popular video conferencing apps.

4. OPS Compute

For added flexibility and versatility, the B Series includes an OPS slot for inclusion of a range of optional compute modules.

5. OPS Google EDLA

Run EDLA-certified apps from the Google Play Store, ideal for customers needing flexible app-based signage environments.

6. Media Players

Connect external players or networked playback systems for rapid, installer friendly deployment of existing CMS ecosystems.

7. OPS Chrome OS Player

Insert an approved Chrome OS OPS compute for customers already using Google's digital signage or workspace tools.
