onfire
L E A R N I N G

OnFire Learning provides school districts with a turn-key, teacher-editable, standards-aligned, fully-digital curriculum platform for all subjects (6th-12th) + STEM/CTE electives.

Schools can also choose to add an accredited General Ed Associate Degree (A.S.) in the very same platform.

The platform and content is hosted within the highly-scalable AWS environment

Empowering Students
Digital Learning Anywhere

Onfire's digital flexibility is the answer to evolving school schedules and instructional plans. Spark LMS and digital content provides the technology and support to implement your learning model.

The platform meets the learning needs of every teacher and student—from fully online options to blended classrooms and personalized learning. We customize a delivery model that fits your school needs.

Empowering Teachers
Personalized Learning for Each Student

Utilize our pre-loaded standards based curriculum as is, customize and edit as needed or create new courses with ease. Onfire allows teachers to address the interests and learning styles of each student. Spark makes it simple to deliver content, view student's progress, assess their needs, adapt instruction and provide support as needed.

Information concerning student progress allows teachers to make data-driven decisions to differentiate instruction for each student. Teachers can also issue a final grade directly from their dashboard.

Course Catalog

Spark offers 100+ courses designed to engage and inspire every student. Each course is built and aligned to the Common Core Standards and Objectives. The curriculum provides rigor and the assessments provide feedback to differentiate instruction.

Enrollment and Reporting

For administrators, teachers, and mentors, Spark integrates with many existing district systems, reduces system complexity, simplifies administration, and provides intelligent reporting and analytics to enable data-driven decisions.

Client Results

Onfire Learning's partner schools and districts use digital learning to provide a world of opportunities to their students. We've worked with large and small schools and districts in urban and rural settings across the country.

Implementation and Support

We know that it's not easy to start using something new. Our team is ready to train and support all users with the highest quality of service.

Getting Started

- Platform and curriculum grades 6-12 for only $600 / student / semester.
- Platform, curriculum, certified-teachers grades 6-12 for only $2,100 / student / semester.
- Platform and Accredited General Ed Degree (A.S.) for only $1,750 / student / semester with unlimited access to transferable college credits.

" Spark allows me to spend time with students who need a little more help in certain areas. It's powerful to watch their faces light up as they grasp concepts and realize they are capable of doing the work.

Rishelle M.

" As a teacher, when you teach a hundred and fifty kids a day, there is no practical way to manage them without a system like Spark.

Betty D.
