⚠ 82% of breaches start with a compromised identity

Identity Is the Perimeter With No Edges.

Most breaches start with a compromised identity, not a broken firewall — AM is the front door of Zero Trust.

Talk to sales

Traditional access management stops checking the moment you log in. Cross Identity doesn't. Every request — from every device, every app, every identity — gets verified continuously, not just once at the door.

500+	25+	12+	6
Enterprise Implementations	Years IAM Expertise	Fortune 50 Clients	Capabilities, One Risk Engine

One Directory, Every Identity
Workforce, customer, machine — one source of truth.

Any Authenticator, Your Choice
OTP, soft tokens, FIDO2, YubiKey, or passwordless — no vendor lock-in.

One Login, Every App
SSO via SAML, OIDC, OAuth — plus vaulting for legacy apps that can't federate.

Security That Adapts
Policy by network, location, time, device — live-adjusted by risk.

MFA at Every Level
Not just login — platform, app, and individual transactions, too.

Risk-Aware, Not Just Rule-Based
A War Chief risk flag triggers step-up on the very next login.

ALSO INCLUDED Self-service password management · Built-in OAuth & OpenID Connect consent management

BUILT ON ONE CONVERGED PLATFORM

Not stitched-together acquisitions. One identity fabric.

With 25+ years of global IAM expertise, Cross Identity governs workforce, customer, AI, and cloud identities under one unified platform — recognized by KuppingerCole across IGA, IAM, Access Management, and Identity Fabric. AM isn't a bolted-on login tool: it runs on that same fabric as every other module, so risk intelligence, governance, and access always share the same real-time picture.

Start with AM. Expand on your own timeline. No pilot, no proof-of-concept gate — just one module, live, today.
