

Cybercriminals have smaller businesses in their crosshairs.

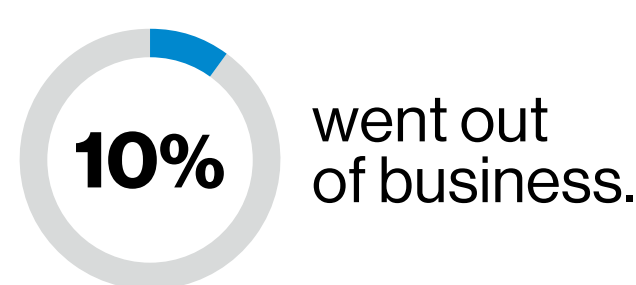

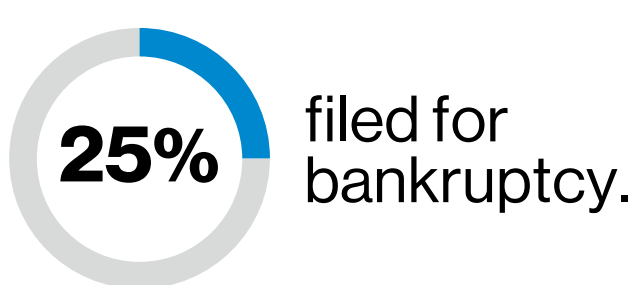

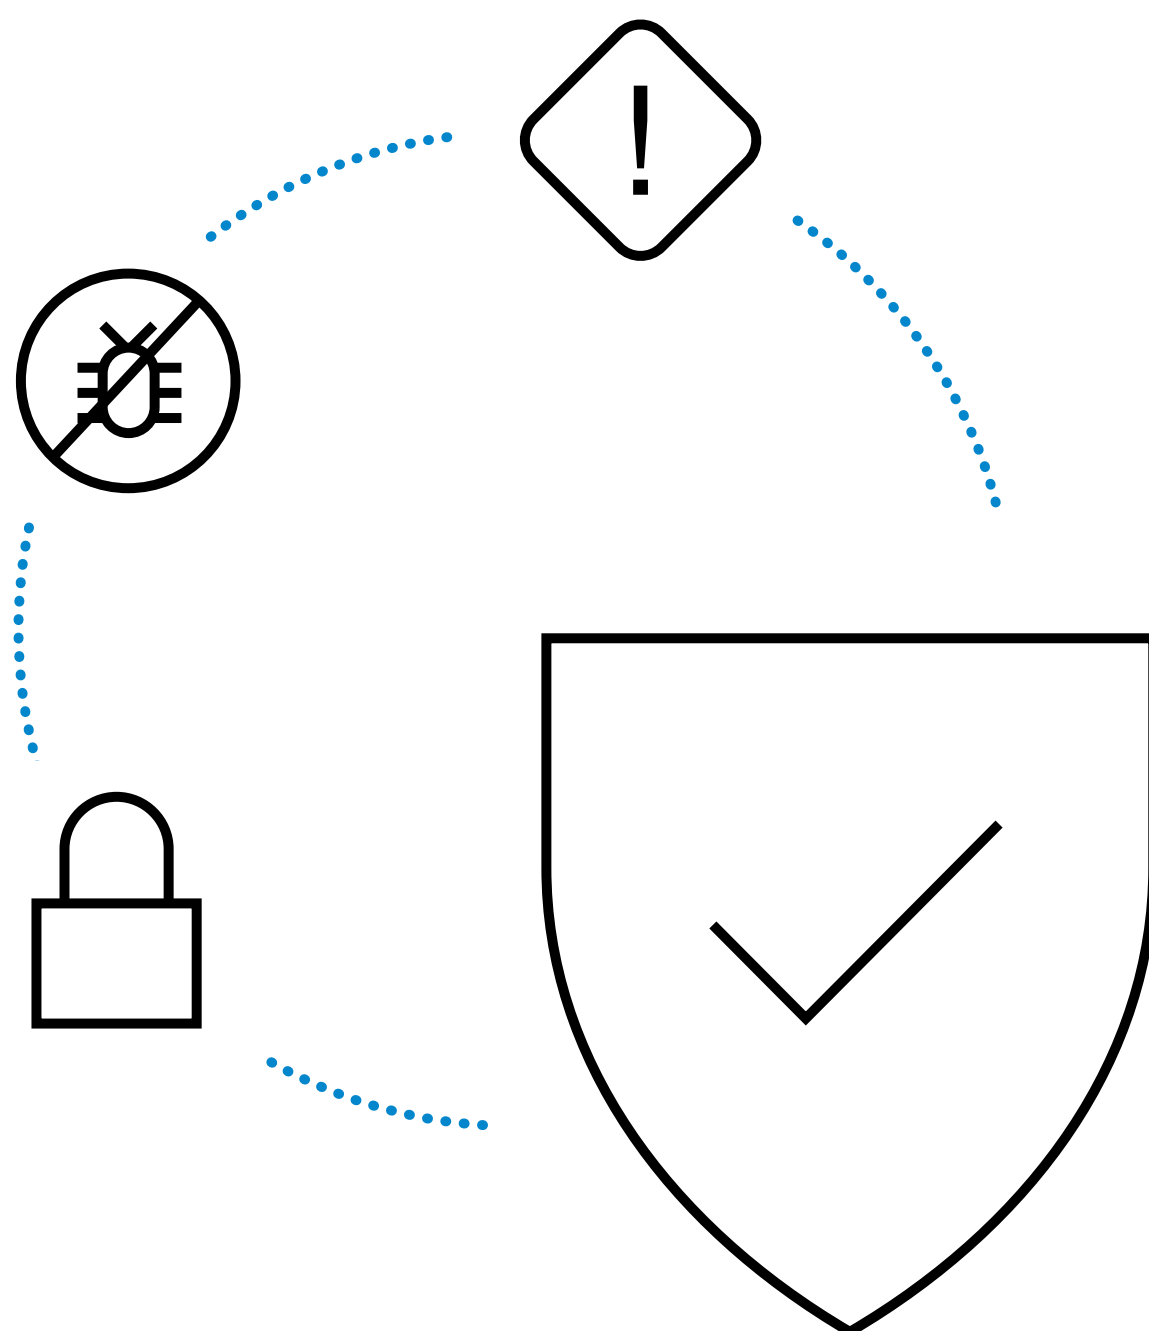

The implications can be significant. Here's the case for strengthening your cybersecurity—and how to do it.

Nearly 30% of breaches analyzed in the 2020 Verizon Data Breach Investigations Report involved small-business victims.¹

The consequences of experiencing a data breach for small businesses in 2019²:

You need a simple, comprehensive solution for your security needs.

When it comes to your business, defending against cyberthreats that could jeopardize proprietary information or force costly downtime is critical. Verizon Business Internet Secure is a powerful and simple security bundle that helps keep your devices attack ready so your business information and financial records can stay safe.

Verizon Business Internet Secure helps keep small businesses cyberthreat ready.

Business Internet Secure is a business security bundle that combines predictive antivirus software with internet protection, giving you security that goes beyond traditional antivirus solutions alone.

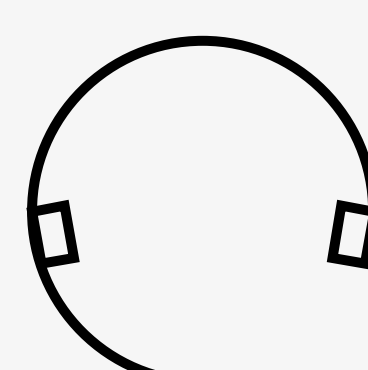

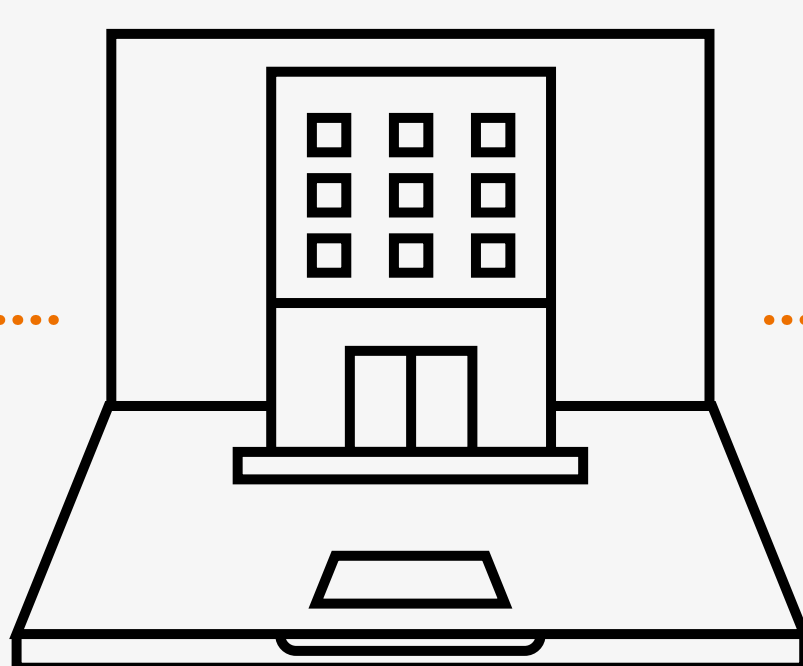

Antivirus software

proactively protects computers, tablets and phones against malicious software.

Internet security

helps safeguard your computers, tablets and phones by blocking traffic to and from malicious websites.

An online dashboard

makes it easy to manage and monitor activity on computers, tablets and phones.

24/7 security tech support

is available to provide expert installation, deployment and management assistance.

Why Verizon?

25+

years of security experience

A leader in Gartner's Magic Quadrant for Managed Security Services, Worldwide³

How can an affordable yet powerful security solution help keep your business ready for emerging cyberthreats?

Let's explore the possibilities.
