Generate Police Reports in Half the Time

CLIPr

Every day, over 300,000 hours of Body-worn Camera (BWC) footage is recorded across the U.S. Yet officers still spend 50%+ of their shift writing reports.

CLIPr changes that.

- ✓ Cut reporting time in half
- ✓ Boost Officer Morale And Reduce Burnout
- ✓ Ensure Accuracy And Consistency
- ✓ Stay compliant with CJIS and works with all major BWC platforms

We automatically index and summarize BWC video, then generate a draft police report—saving time, reducing burnout, and getting officers back in the field faster.

FREE 30-90 DAY PILOT* FOR UP TO 50 OFFICERS

*Subject to approval

No cost. No disruption. Try CLIPr with your team and measure the results for yourself.

aws In partnership with Amazon Web Services.

How It Works

CLIPr

01 Dock Your Device

Simply dock your BWC or InCar video device as usual, and CLIPr automatically receives the camera footage for processing. Departments can choose what footage gets processed.

02 Receive an Email

When your draft report is ready, you'll be notified instantly.

03 Review the Draft

Edit and approve the auto-generated report. Search or browse the BWC within the CLIPr Player or refer to CLIPr Notes. Use CLIPr's dictionary tool to fix recurring issues.

04 Copy & Save

Paste the finalized report into your Records Management System (RMS). Done.

CLIPr Pilot Program: 3 Phases Over 60 Days

Crawl – Week 1 (5% Engagement)

- Zone Commander/District & Records Dept debriefings
- Officer pre-patrol debriefings

Walk & Configure – Weeks 2–4 (10%)

- Manual uploads from select officers
- Partner with IT to configure auto-upload from your existing Digital Evidence Management Solution (DEMS).

Run – Days 30–60 (50–100%)

- Activate Dock & Auto-Upload for officers selected for the pilot
- Track usage, feedback & time savings
