

# Get to know Cisco's Small Business solutions

You run your business, by your rules. Cisco Small Business solutions work as hard as you do to enable your ambitions. Discover how to supercharge your business with the technology we have to offer. And you can even try certain products before you buy with our free, no obligation trials.

## Cloud Networking

Meet your networking needs from the cloud, with the Cisco Meraki Wireless, Switching, Routing and Security portfolio. For truly small deployments, Meraki Go offers Indoor and Outdoor Wireless Access Points and switches, configured and managed from a mobile device app with no technical know-how required.

## Network On Prem

Cisco's on-premise networking products are built especially for the less complex business by providing reliable, robust, price-sensitive switching, Wi-Fi and routing. Our on-premise management platform FindIT enables simple configuration and management of the network, with inclusive 24x7 support.

## Collaborate

Communicate and collaborate with your teams and customers using voice and video calling. Cisco Webex keeps everyone connected with the security and performance you need. Webex Calling means you can receive calls on desktop and mobile using the Webex Teams app. With Webex Meetings and Webex Teams, experience video-first enhanced collaboration with rich messaging, content sharing and meeting capabilities.

## Secure

Small businesses can be particularly vulnerable to a data breach. Protect your business with Cisco Security products. Ensure DNS website addresses are not malicious with Cisco Umbrella. Instead of passwords, authenticate the identity of all users attempting to access your network using Cisco Duo. Ensure files do not contain malware such as viruses with Cisco Advanced Malware Protection (AMP), the world's largest Security Intelligence platform. And guard the entry point to your network with the Cisco Firepower firewall.

## Compute

Businesses of any size require applications to run their business. Cisco UCS offers standalone compute capability and Cisco Hyperflex Edge offers a converged solution of Compute and Storage – both can be managed from anywhere with Cisco Intersight. With AppDynamics, assess application performance from your online and app-based business processes to gain business and customer insights and analytics.
