# ilantus

# INNOVATIVE AND SAAS-DELIVERED CONVERGED IAM PLATFORM

## COMPACT IDENTITY

Compact Identity is a Converged IAM platform. It seamlessly combines all the critical elements of Access Management, Identity Governance and Administration, into a single and modular codebase. It can be deployed both on-prem and in the cloud.

The product is cloud-native and risk-aware. It is an all-in-one solution is built on the Zero Trust framework to provide identity-centric and holistic cybersecurity to secure your organization and empower your digital transformation. It has been lauded for its innovative features and simplicity. It drives superior ROI and exceptional user adoption rates. Compact Identity is the only true SaaS-delivered Converged IAM solution amongst its competitors. Other vendors offer limited functionality, scope, or depth, and simply do not qualify as truly 'Converged' solutions.
