

Modernize Your IT Environment

Eighty-eight percent of leaders expect innovation to accelerate, yet only 52% feel prepared.¹ Dell Technologies delivers solutions that align with Federal priorities.

Accelerate AI adoption.

Optimize multicloud and edge.

Improve data center efficiency.

Strengthen cyber resiliency.

Modernize application platforms.

Modernize Your IT Environment

Accelerate AI adoption

Deploy AI where your data lives — data center, cloud or edge. Our right-sized infrastructure prevents overprovisioning while reducing costs.

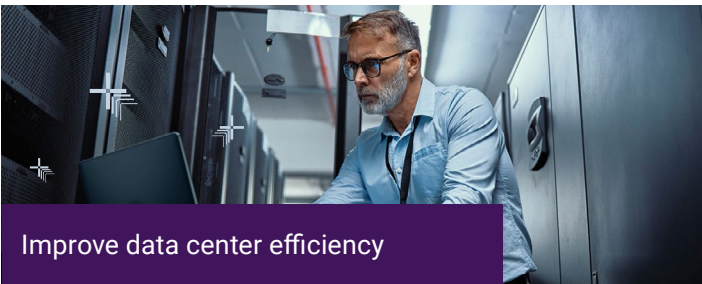

Why this matters: AI-ready infrastructure supports mission-critical analysis while meeting NIST AI Risk Management Framework requirements.

Optimize multicloud and edge

Unify operations across edge, core and cloud with a consistent operating experience. Maintain control of sensitive data while driving innovation.

Why this matters: It aligns with Cloud Smart strategy and FedRAMP Modernization for optimized IT investments.

Improve data center efficiency

By 2027, 40% of data centers running AI will face power constraints.² Our newest Dell PowerEdge servers deliver the same performance as seven older servers — using significantly less energy.

Why this matters: This helps meet Executive Order 14057 sustainability requirements while reducing TCO.

Strengthen cyber resiliency

Eighty-three percent of organizations worldwide experienced security attacks last year.² We deliver trusted infrastructure with secure supply chain practices.

Why this matters: It supports Zero Trust architecture and CISA directives for critical infrastructure protection.

Modernize application platforms

Blend the flexibility of three-tier systems with hyperconverged simplicity to support diverse workloads.

Eighty-nine percent of organizations recognize multiple hypervisor evaluation as strategic.³

Why this matters: It supports FedRAMP and FISMA compliance while enabling mission flexibility during cloud transitions.

40% of data centers running AI will face power constraints by 2027.²
