Microsoft Surface

Are you set up to succeed in a hybrid world?

Flexible and remote work styles come with new considerations for leaders—changing employee needs and technology requirements.

The workplace is changing.

66% of leaders say their company is considering redesigning office space for hybrid work.[1]

73% of employees want flexible remote work options to stay.[1]

50% of business leaders expect their workforce will remain remote or hybrid post-pandemic.[2]

Ensure your PCs are ready for hybrid work.

Over 70% of business leaders from a recent survey believe their companies need improvements to PC quality to support hybrid work.[2] Employees are looking for PC features and peripherals that can help them do their best work, wherever they are.

Portability

Leaders are investing in PCs to support and secure employees.

76% of business and technology leaders plan to increase investments in PCs over the next couple years.[2]

Top 3 benefits of improved PCs include enhanced productivity, improved customer experience, and greater use of existing technology solutions.[2]

2 in 3 IT leaders believe there needs to be significant to moderate improvements in device security to support hybrid work.[5]

5 questions to ask when evaluating your device strategy.

1 Does our device strategy put employee experience at the center?

2 Have we mapped new employee routines to understand their needs?

3 Do our PCs support new employee routines and drive employee experience?

4 Beyond devices, does our technology stack support employee productivity?

5 Should we reconsider our device refresh cycle to improve business resilience?
