

**FORTINET**

# Stay Connected When It Matters Most

## Emergency Connectivity Kit (ECK)

Powered by Fortinet, Parsec and Omni | Built By TD SYNnex

Designed for rapid deployment, the ECK delivers secure, dependable connectivity in mission-critical environments. Built in TD SYNnex integration labs, the ECK combines Fortinet's FortiExtender, Parsec antennas, Omni batteries and other secure services to achieve this.

## Our dogs will hunt (for safe connections).

The ECK is your best friend when secure communications in remote areas are a must. We have two pre-configured offers to meet your critical connectivity needs:

### Bloodhound

A rugged, portable 5G solution made for secure connectivity.

Built for high-performance field operations, the Bloodhound is a portable 5G case antenna with up to 13:1 configuration. It supports the full 5G spectrum (600 MHz to 6 GHz) and is ideal for:

First responders

Surveillance and covert ops

Communications in compromised zones

#### Features

- Shock-absorbing, impact-resistant resin
- Customizable configurations
- Rugged design for harsh environments

### Pitbull

A satellite and cellular hybrid solution made for connecting in emergencies.

The Pitbull integrates Starlink satellite internet with 5G cellular and Wi-Fi in a compact, carry-on case. Perfect for:

Disaster relief

Enterprise failover scenarios

#### Features

- Dual 4x4 MIMO cellular and Wi-Fi
- Starlink mini mount (dish sold separately)
- GPS and RJ45
- IP67-rated rugged case
- Compatible with FirstNet's Band 14

## Why ECK is best-in-show.

Our solution maintains reliable connectivity in unpredictable environments:

- Rapid WAN access in remote or disaster zones
- Unified management across cellular, satellite and Wi-Fi
- Reduced downtime and operational costs
- Supports zero trust architecture

## Where ECK works best.

This offering is built for high-impact scenarios, including:

### Public safety

Emergencies and disaster recovery

### Military

Tactical field operations

### Events

Elections, festivals, kiosks

### Media

Mobile broadcast and streaming

### Disaster zones

Infrastructure failover

## Fetch your own ECK at TD SYNnex Integration Labs

Each kit is assembled, tested, and customized in our labs to ensure seamless deployment and performance in the field.

To learn more about these solutions or to get started with your own ECK, contact the TD SYNnex Fortinet team at [FortinetBD@tdsynnex.com](mailto:FortinetBD@tdsynnex.com).
