

HPE GREENLAKE FOR DATA PROTECTION

HPE BACKUP AND RECOVERY SERVICE

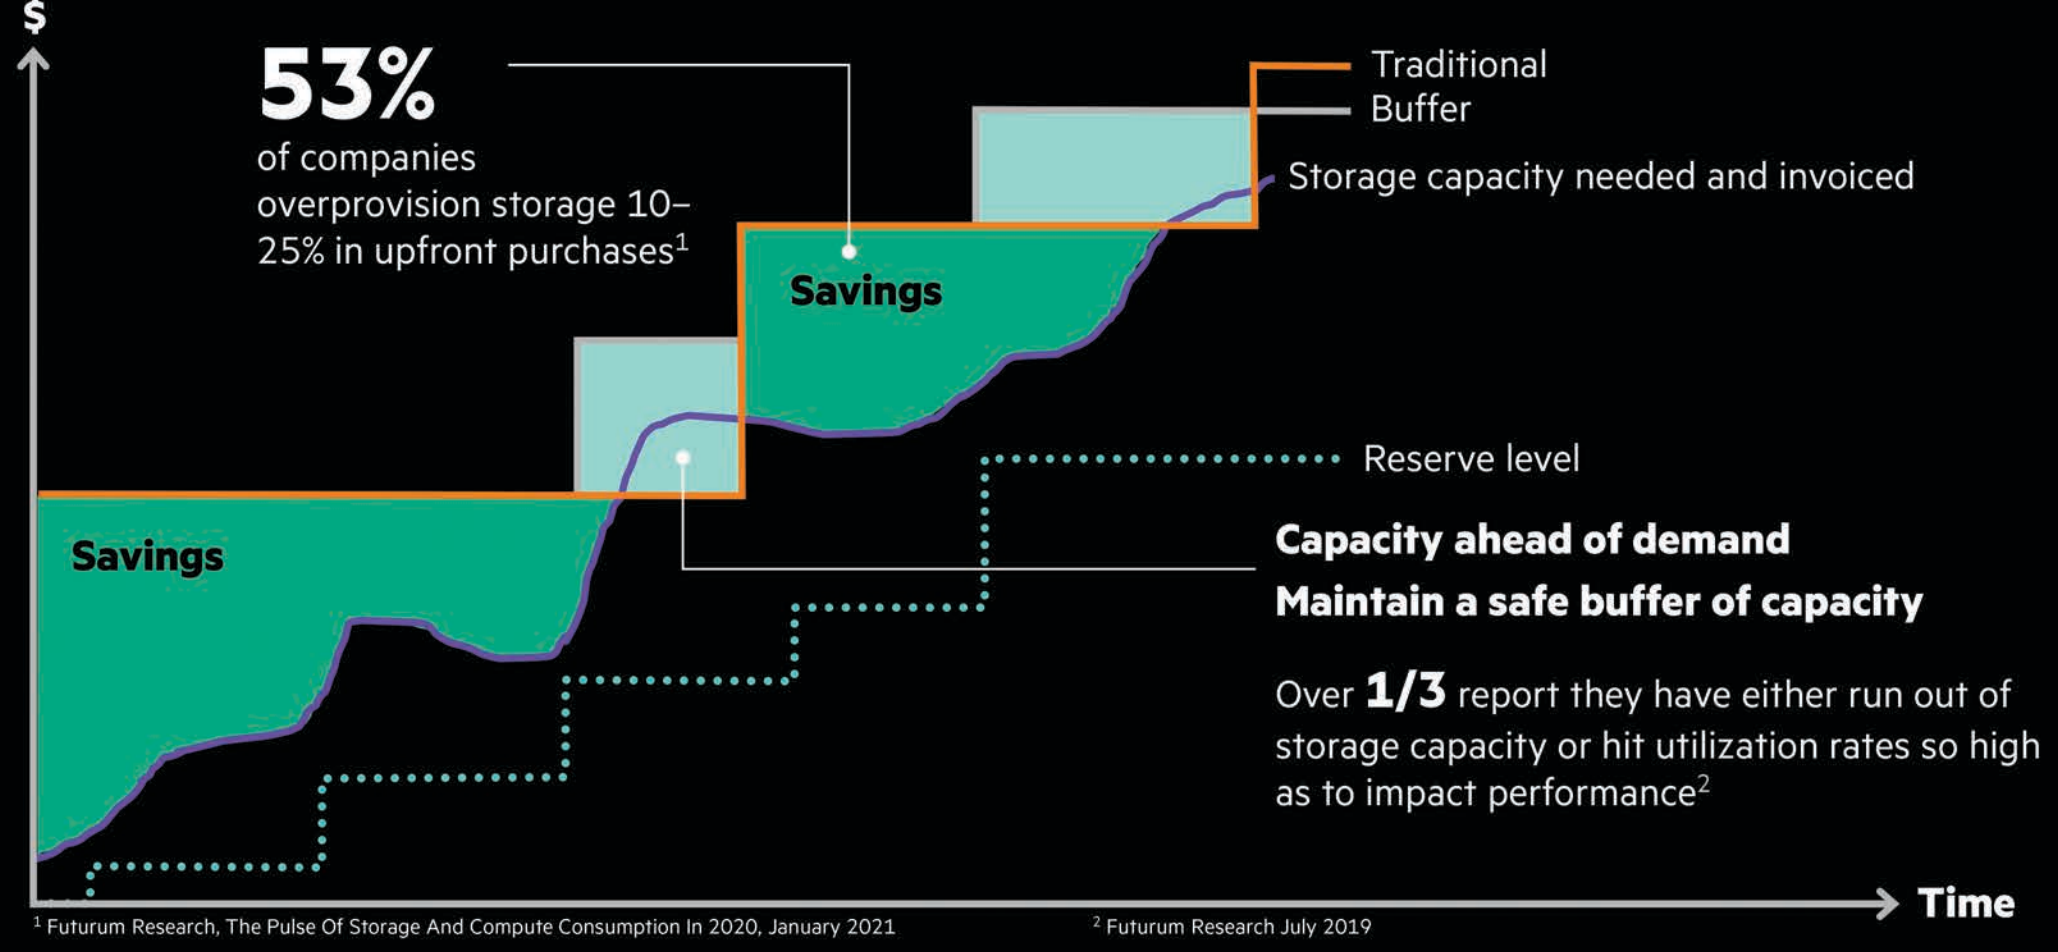

Consistent and reliable data protection

SIMPLIFYING HYBRID CLOUD DATA PROTECTION

HOW YOU SAVE WITH AN AS-A-SERVICE MODEL

HIGHLY EFFICIENT DATA PROTECTION

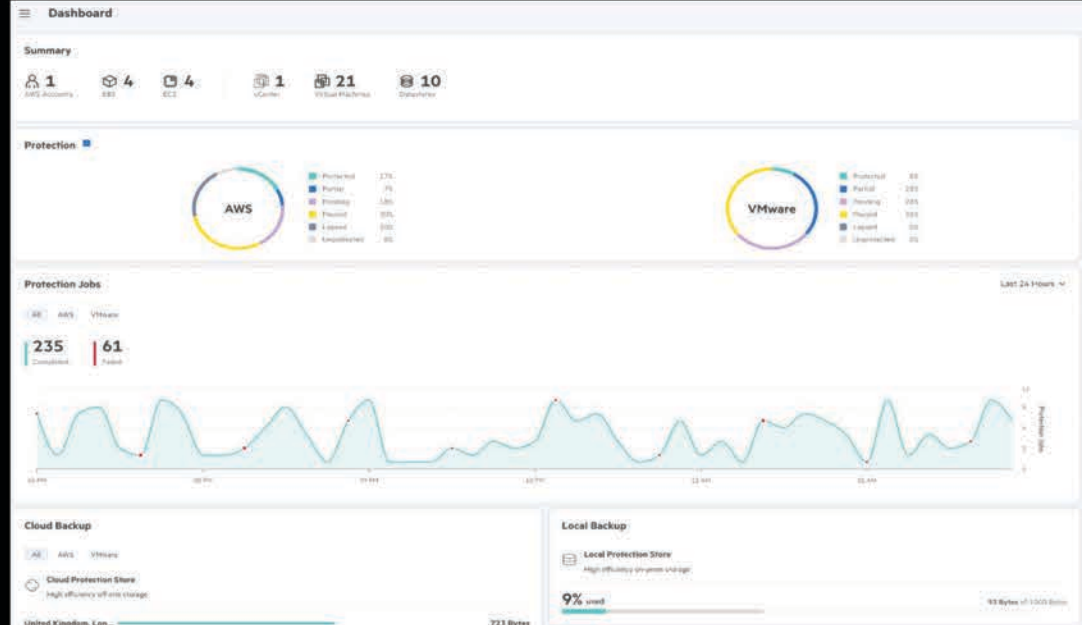

Reduce costs, retain more, remove unpredictability

*Internal testing comparing HPE Backup and Recovery Service with three other competing VMware backup solutions

TAKE THE TIME AND STRESS OUT OF DATA PROTECTION

- 1 Allocate VMs, EC2 instances and EBS volumes to Protection groups
- 2 Configure Protection Policies
- 3 Apply Protection Policies to Protection Groups

Protect your VMs, EC2 instances and EBS volumes in minutes in few simple steps

HPE BACKUP AND RECOVERY SERVICE—SECURE BY DESIGN

- Encryption**
All data, at rest and in flight.
- Immutability**
Data copies that cannot be changed by anyone
- Dual-Authorization**
Destructive operations require escalation and approval
- Air-Gap**
Physical disconnection between production environment and backup copy
- Built on secure HPE GreenLake Platform**
Multi-level security for access, authentication, authorization and communications
