Device as a Service (DaaS)

Smart, simplified computing solutions for today's world.

Introducing DaaS

Optimize your IT assets and resources with Device as a Service (DaaS), a complete solution that combines hardware, insightful analytics, proactive management, and services for every stage of the device lifecycle.

Managing and securing multi-OS environments can be challenging

Device proliferation and the addition of personal devices entering the workplace has challenged ITDMs in maintaining a secure and manageable IT environment. Multiple operating systems on different types of devices have created new entry points for security breaches and made it more difficult to proactively manage the IT environment. DaaS makes it easier to manage the diversity of multi-OS desktops, workstations, and mobile devices so your business can operate at its full potential.

The right devices for the job

Choose a device mix that's as unique as your business, with a wide selection of HP commercial notebooks, desktops, and mobile and specialized devices.

Management with insight

Secure and manage multi-OS devices, and proactively identify and mitigate issues with insightful HP TechPulse analytics. Our Service Experts can enforce security policies and perform daily management with leading endpoint management tools.

Proactive management with HP TechPulse

Insightful and predictive analytics

Identify, predict, and address issues with HP TechPulse—analytics that use machine learning, preconfigured logic, and contextual data to deliver device, application, and usage insights that help you optimize your IT spending and resources.

Lighten the load on IT

Offload a little or a lot. Our Service Experts use HP TechPulse analytics and modern management tools to manage your multi-OS devices. The one-stop dashboard also allows incident integration with ServiceNow IT service management system.

Flexibility for your business

Don't pay for more than you use. Tailor your solution with HP Lifecycle Services—from design to configuration, maintenance, and end of use—to meet your needs with the convenience of a single price per device. Flex your devices and services up or down based on changing workplace or workforce needs.

One-stop solution

Device as a Service (DaaS) delivers a modern service model that simplifies how commercial organizations equip their employees with the right hardware, accessories, and lifecycle services to get the job done, while improving end-user and IT performance, agility, and cost predictability.

With Device as a Service, you get:

A wide variety of device choices

Technical support and rapid repair or replacement

Insightful and predictive analytics from TechPulse

Flexible plans with a simple, predictable price

Proactive management and lifecycle services
