

Managing chronic diseases from the home to the hospital.

Changing Healthcare As We Know It

CMS has issued its final update to the 2019 Physician Fee Schedule and Quality Payment Program, including three new CPT codes for reimbursement of remote patient monitoring. These changes mark an important step in the government's acceptance of mHealth and telehealth technology.

Samsung, aligned with our partners, possesses the technology, the devices and the solutions that address the requirements for a successful remote patient monitoring program as outlined by these new CPT codes.

We have easy-to-use devices for patient engagement with their doctors, device security to protect patient privacy, and product connectivity to new sensor and monitoring devices as they enter the market.

Why Samsung for RPM?

Utilization of remote care management platform with Samsung Galaxy tablets, smartphones and watches

Secure data transmission supported by Samsung Knox™ mobile security solution¹

Accessibility of total turnkey workflow services for clinicians

Clear Communications

Two-way communication is vital to an RPM kit. Samsung mobile devices deliver excellent connectivity and picture clarity, for clear patient-doctor interaction.

Easy To Use

Samsung tablets, phones and watches are easy to use and provide solution flexibility, since they can be used in any portfolio of RPM configurations.

Integration Into EHR

Patient information delivered on Samsung mobile devices through our partners' applications can be integrated into a provider's EHR.

Key Samsung RPM Software Providers

Platform for remote patient monitoring empowers care where it's needed the most, while delivering advanced program management.

Platform simplifies how patients, doctors and caregivers track, monitor and manage health conditions.

MCMS offers a full suite of peripheral devices connected to patient platforms to monitor biometrics and vital signs.

Vista Solution™ discrete monitoring provides continuous monitoring for patients in hospitals and homes.

Provides care teams with the tools they need to remotely track the health of their patients at home.

Brings remote monitoring capabilities for medical, wellness and performance-based needs, including the monitoring of vital signs.

The new CPT codes.

CPT Code 99453 "Remote monitoring of physiologic parameter(s) (eg, weight, blood pressure, pulse oximetry, respiratory flow rate), initial; set-up and patient education on use of equipment."

CPT Code 99454 "Remote monitoring of physiologic parameter(s) (eg, weight, blood pressure, pulse oximetry, respiratory flow rate), initial; device(s) supply with daily recording(s) or programmed alert(s) transmission, each 30 days."

CPT Code 99457 "Remote physiologic monitoring treatment management services, 20 minutes or more of clinical staff/physician/other qualified healthcare professional time in a calendar month requiring interactive communication with the patient/caregiver during the month."

Samsung Galaxy RPM Portfolio
