Be Prepared for Today's Threat Climate

Ransom demands rose 31 percent from Q2 to Q3 2020, with an average of $234,000, while hackers threaten victims with extortion using exfiltrated data in nearly 50 percent of ransomware attacks.***

**Lenovo**

Backup and Replication software

Lenovo SR650 Server*

Lenovo DE Series Disk Storage System**

CDW has partnered with Veeam and Lenovo to deliver a solution offering powerful protection

Primary — VM VM VM / Hypervisor / ThinkSystem / Lenovo DE-Series or any Production Storage

Backup and Replication — amazon webservices / Air Gap to secondary copies / veeam / ThinkSystem / Lenovo DE-Series Backup Repository / SAS / FC /iSCSI Direct-SAN Access

Combining the ThinkSystem SR650 server with the capable and versatile DE-Series storage unleashes the power of Veeam software. With parallel processing and the ability to serve applications from the backup system, this solution can keep your operations running, regardless of unplanned events, while reducing operational workload.

Business Stabilization

- Immutability mode for Cloud Tier protects data from infection
- Sub-2 minute VM recoveries
- Simplified Capacity Management
- Auto-discovery of new VMs
- Image or granular recoveries

Cost Containment

- Consolidate multiple backup servers into a single system
- Save space with deduplication
- Cloud, Physical, and Virtual protection
- Vmware, Hyper-V, Nutanix hypervisors
- Cloud to Cloud Backup Management

CDW negotiated a substantial discount this quarter to support our customers through these challenging times. Ask your CDW Account Manager for more information

* Lenovo servers have been ranked #1 in the reliability and support categories for the past 7 years

** DE Series is SAN-attached storage designed to handle multiple, simultaneous workloads. The core technology has shipped over one million units and delivers a field-proven 99.999% availability rating
