# Field Work Demands Rugged Technology

Acer Laptops and Tablets with certified military-grade durability help keep field workers productive and connected.

Built to be Rugged

Acer rugged laptops and tablets feature:

- MIL-810G certifications
- IP ratings of up to IP65
- Certified Mil-Spec-Meeting Military Grade Testing
- "Ingress Protection" preventing contaminants like dust or water from entering the device chassis or casing
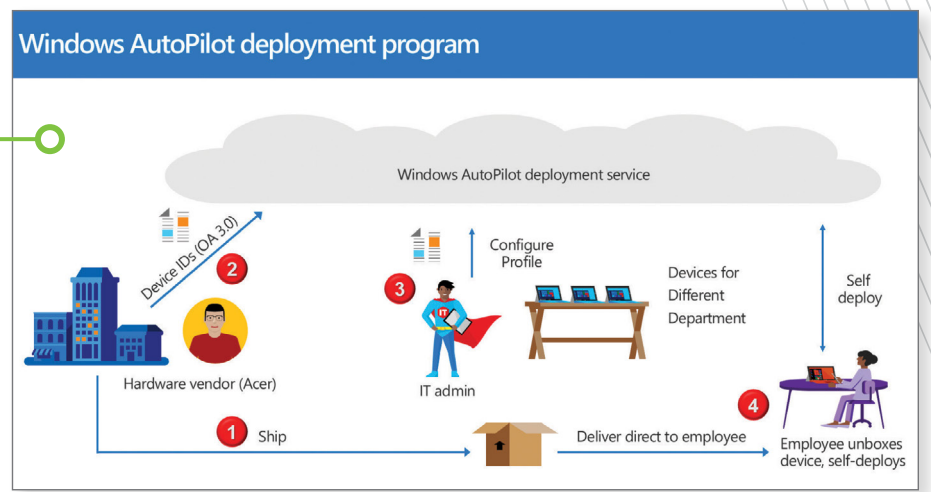

Acer Enduro Manageability Suite (AEMS) provides:

- Device protections
- Enables IT managers to expedite service deployment and system configurations

Enduro N3 on Autopilot

The Acer Enduro N3 model supports Microsoft Windows Autopilot. Autopilot vastly reduces the amount of time IT has to spend on deploying, managing, and retiring devices.

Windows AutoPilot deployment program

The Acer Enduro N3 features:

- TPM 2.0 anti-tampering chip
- Fingerprint login
- Windows Hello
- Full Windows 10 security

The Acer Enduro N3 is powered by the 10th Gen Intel® CoreTM i7 processor, with an optional NVIDIA® MX230 discrete graphics chip, up to 32GB DDR4 memory, up to 1TB of HDD storage, and an optional 512GB PCIe Gen3 NVMe SSD storage.

Acer Enduro T1:

This compact and durable 10.1" rugged Windows tablet is MIL-STD 810G and IP54 certified and features:

- Programmable keys and an optional portfolio keyboard to transform into a 10.1" laptop
- Intel® Celeron processor with up to 4GB of LPDDR4 system memory and 64GB of eMMC storage
- Direct bonded touchscreen is covered with Corning Gorilla Glass

Field workers of all types can benefit from a laptop designed to take a beating and continue performing at an optimal level.
