KEEPING UP WITH THE EVOLVING WORKPLACE

9 EMERGING TRENDS SHAPING OUR NEW FUTURE

04

In the early stages of the health crisis, most organizations focused on safety concerns first, followed by immediate connectivity challenges

05

The health crisis accelerated unanticipated investments that were not always aligned to long-term roadmaps

06

Remote work has changed existing infrastructure, hardware, and on-premises investment strategies

07

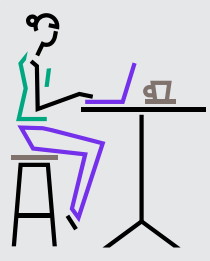
The health crisis accelerated innovation in manufacturing and industrial organizations while repurposing existing technology for novel use cases

08

Organizations have adopted a new lens for measuring remote work productivity

09

Employees are conflicted about remote work—appreciating the benefits and voicing concerns



01

Remote work attitude is influenced by cultural norms but has seen a shift during the current health crisis

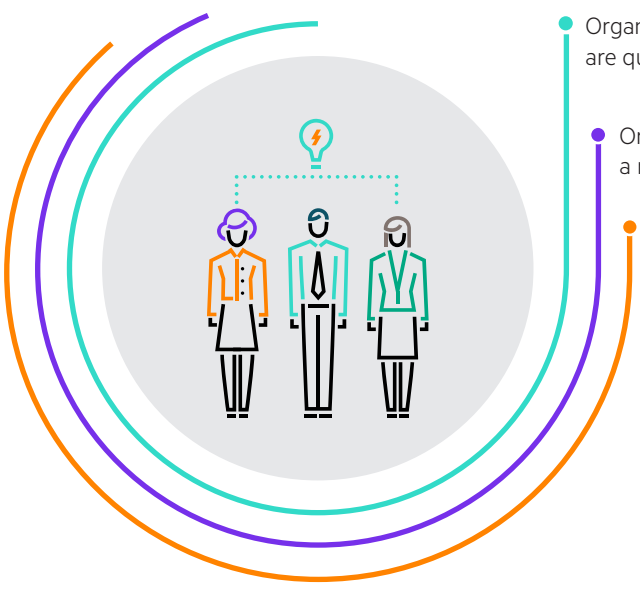
02

Top leaders—the C-suite, business owners, and the board—shape the cultural shift toward remote work

03

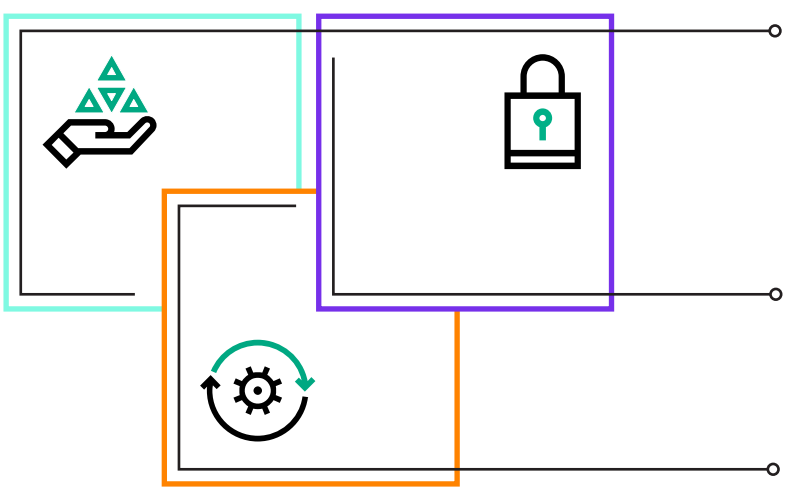
The emerging convergence between HR and IT has created new shared responsibilities and policies

THE EVOLVING WORKPLACE PROTOTYPES



- Organizations that experienced a short-term shift to remote work and are quickly returning to their previous work environment
- Organizations that quickly shifted to a hybrid environment and have a mix of full-remote, hybrid, and in-office work based on job roles
- Organizations with pre-existing remote work plans or mature technology strategies that swiftly transitioned to remote work and intend to continue with flexible work scenarios

MEANWHILE, MANY ARE GRAPPLING WITH WORKPLACE TRANSFORMATION BLOCKERS



- Technology has changed from a productivity enabler to foundation of collaboration and employee experience, but its potential is driven or limited by culture and policies
- Security and compliance challenges increase as employees shift to remote work
- Unprecedented levels of privacy and ethical considerations emerge as organizations approach automation and new ways to monitor productivity

PRESSING PRIORITIES OF THE EVOLVING WORKPLACE

Empower remote work with VDI solutions—specialized enough to meet light-duty needs for core employees but powerful enough for the unique needs of highly skilled technical professionals

Define best practices for the convergence of HR and IT

Partner with organizations to fill the cloud skills gap

Pave the way for adoption of artificial intelligence (AI)

FIND YOUR HYBRID DIGITAL WORKPLACE WITH HPE

Simplify VDI and scale as your needs change

Uncover the right skillsets for cloud migration, data architecture, and associated security and compliance implications

Get an edge on the new hybrid reality and address key challenges of a distributed workforce by developing proven practices for the growing intersection of HR and IT

Overcome key concerns—expertise, uncertain demand, deployment, and others—and shape your AI vision

The future of the workplace is hybrid. HPE can help you enable reliable, seamless, and safe digital workplaces for your employees across sites, facilities, campuses, home offices, and everywhere in between. Read the white paper to discover how.

Make the right purchase decision. Contact our presales specialists.
