

Unlocking the potential of the Internet of Things

Connectivity Solutions for Public Safety, Government and Healthcare

OUR VISION

To encounter MultiTech innovations everywhere – making life and work better for all.

OUR MISSION

To enable business transformation by solving problems with the courage to innovate previously unimaginable solutions; focusing on customer needs and user experience, while empowering our team to excel and grow.

OUR GOALS

Vertical industry solutions

Product & service expansion

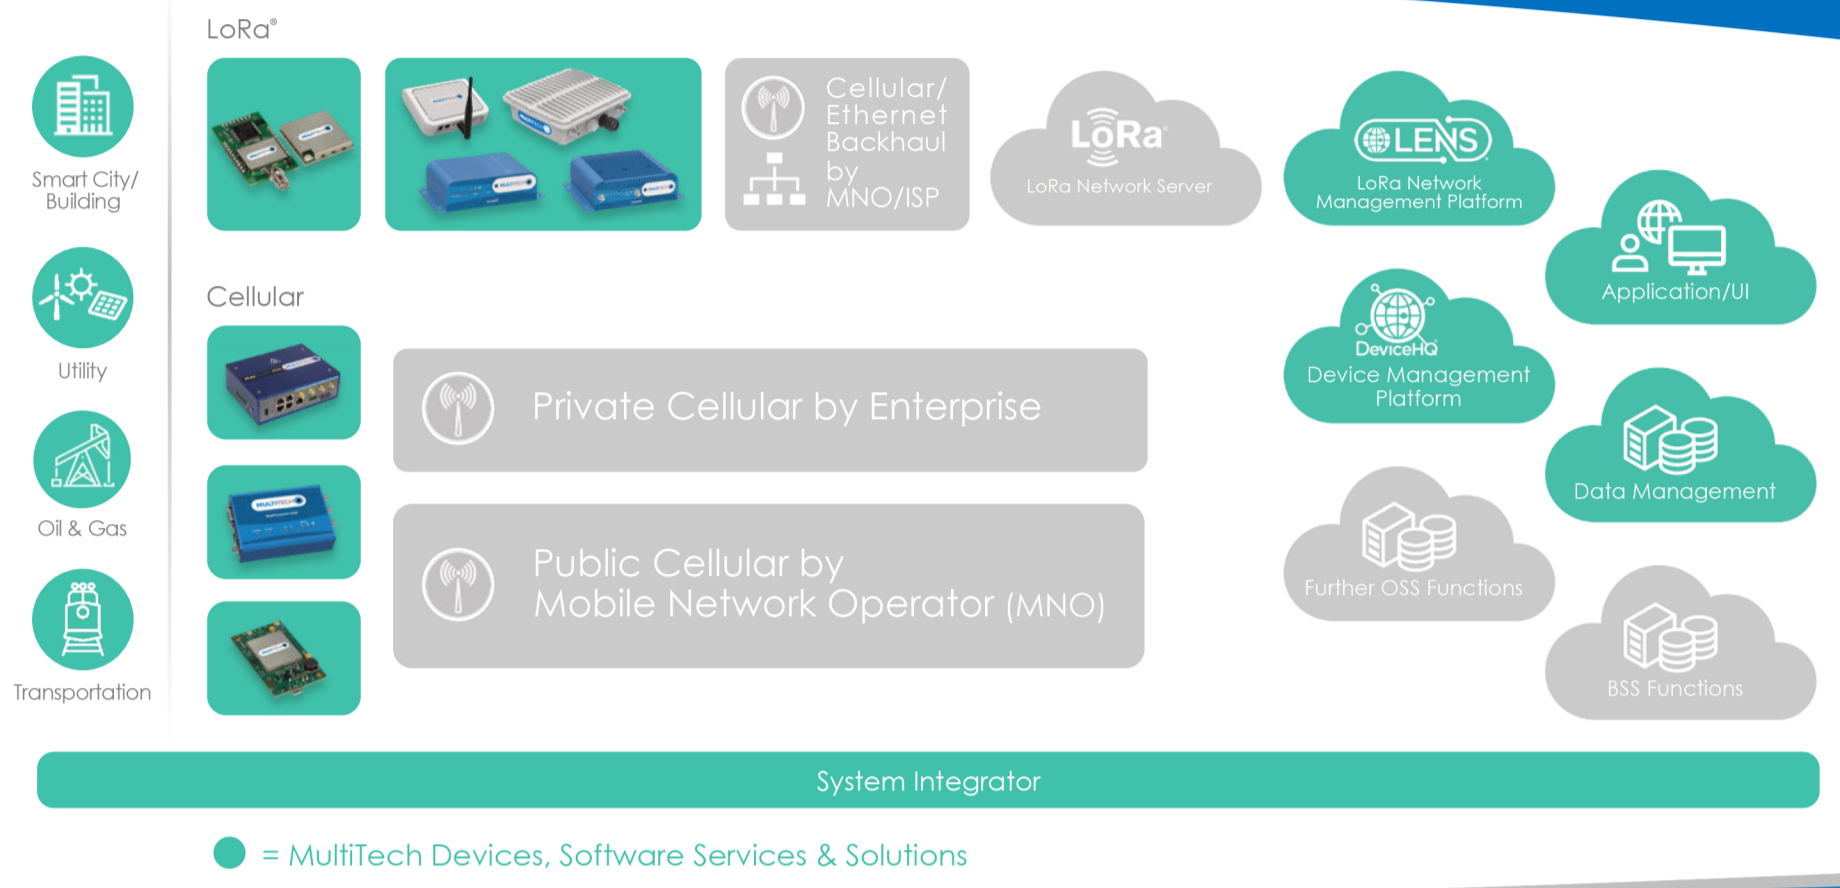

Geographic extension

First-mover advantage

WHERE WE FIT

KEY PRODUCTS & SERVICES

WHY MULTITECH?

**Extensive Portfolio**

Our **wide range** of sensor, authentication and communications technologies, paired with design and integration **expertise** from **edge to application**, results in sophisticated solutions for unparalleled **simplicity** and user experience. Our **United States and global manufacturing** operations give us the agility and flexibility to develop and manufacture **high-quality** connected devices **optimized for performance and value**.

**Passion for Service**

We consider ourselves an extension of your team – which is why we are absolutely **committed to your success**. You can depend on us to **meet and exceed expectations** throughout the development, deployment and maintenance of your solution with outstanding **service and support**.

**Relentless Innovation**

We never stop looking for novel ways to solve problems with technology. We are committed to wading through the complexity on behalf of our customers in order to deliver solutions that are **easy to deploy, use and manage**. We are continuously learning and experimenting **to stay ahead of the latest technologies** and technology transitions. Our **culture of innovation** continues to result in **industry firsts** for us and our customers.

MultiTech Manufacturing and Quality

- On-site U.S. manufacturing
- Maximum control and flexibility
- 100% functional testing
- Global Forward and Reverse Logistics
- Custom Manufacturing
- Activation, provisioning and testing
- Highly trained and cross-trained workforce with an average tenure of more than 15 years
- ISO 9001: 2008 certified
- ISO: 13485 certified, a step above ISO: 9000
- Traceability of parts down to the component level

Who We Serve

Industrial IoT

- Tank Monitoring
  - Kiosk and Vending Management
  - Machine Monitoring & Management
  - Remote Equipment Monitoring
  - Surveillance Monitoring
- Extend Asset Life

Energy

- Smart Grid
  - Car Charging Stations
  - Oil and Gas Production
  - Water/Wastewater
  - Solar and Turbine Management
- Sustain the Planet

Healthcare

- Mobile Connected Devices
  - Medical Assets – SmartCarts
  - Remote Monitoring of Health Conditions
- Save Lives
