

Get Connected.

Work smarter and more productively with Connected Laptops powered by Verizon.

96%

U.S. companies reporting improvements in productivity due to connectivity investments¹

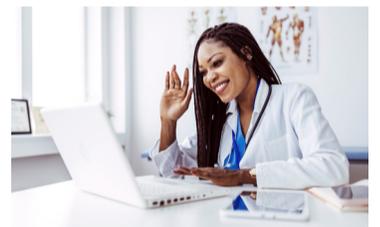

Connected Laptops — the answer to managing your remote workforce.

Connected Laptops give you the secure connectivity you need from virtually anywhere to help keep your data safe and your remote workers as productive and enabled as possible.

79%

Business leaders who say their companies need to invest in AI to stay competitive²

Delivering for today's mobile world with **connected Windows[®] 11 laptops**

Procure connected laptops from your preferred channel partner and connect them to Verizon's secure 5G network. Enabling your employees to connect safely and reliably from virtually anywhere without having to use public WiFi, you gain not only better visibility into your remote workforce, but also:

Security

Enabling a reliable connection to Verizon's secure 5G network is safer than connecting to a public WiFi

Productivity

Verizon's extensive mobile network coverage helps ensure productivity without interruption

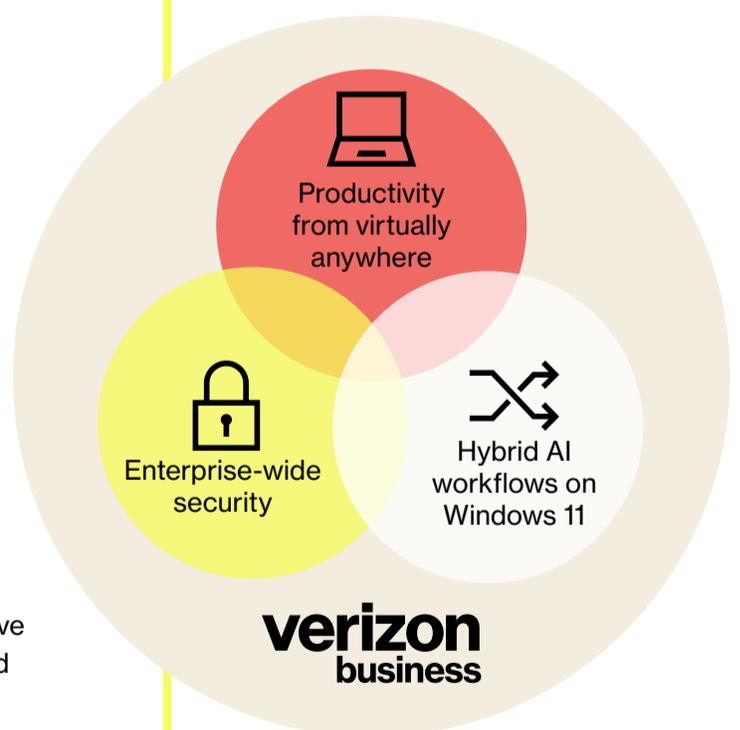

Future-readiness

Support your employees with cloud and on-device AI tools from virtually anywhere with connected Windows 11 laptops

All with the added benefit of the confidence you'll have knowing your employees are getting their high-speed connection with Verizon's reliable 5G network.

\$9.4M

The average cost of a data breach in the U.S. in 2024³

What can Connected Laptops do for your business?

Connected Laptops from Verizon help you effectively and safely manage your remote workforce from virtually anywhere they may be connecting, while also empowering them to be able to do their best work through the high-speed connectivity of Verizon's reliable 5G network.

Find out more about Verizon's multi-channel strategy to be able to offer laptops and plans to match your needs. And take advantage of the reliability, productivity and security advantages this unique solution delivers. **Let's talk!**
