

# Empower students to learn anywhere

## Remote learning presents new challenges

### Managing Uncertainty

Planning for an ever-changing mix of remote, hybrid, and in-person learning creates new challenges for school leaders and IT administrators

### Building Teacher Capacity

Managing a remote or hybrid classroom requires educators to develop new skills and knowledge to keep students engaged

### Keeping Students Safe

Schools leaders need to provide safe environments while providing teachers with simple controls to manage their classrooms

## Learn anywhere with devices built for remote and hybrid learning

**Empower students with devices built for learning.** Support multimodal learning with 2-in-1 laptops with touch and Windows Ink. Offer LTE connectivity to keep students connected.

**Engage everyone with built-in accessibility tools.** Deliver personalized instruction with built-in tools that give students of all abilities independence and the opportunity to learn.

**Secure devices and protect privacy.** Windows 10 is the most secure Windows ever, and includes built-in anti-virus, anti-malware, anti-phishing protection to protect students and educators.

## Secure devices and protect privacy with comprehensive security

**Block threats in the browser.** Microsoft Edge offers the highest rated protection against phishing and malware attempts to help safeguard students online.<sup>1</sup>

**Protect privacy online.** Ensure data is never sold to advertisers with clear privacy controls and ad-free search experiences with Microsoft Edge and Bing.

**Defend devices from malware.** Defend teachers and students from malware and viruses with Microsoft Defender Antivirus.

**Encrypt data on the device.** Protect students against sensitive data theft or exposure from lost or stolen computers with BitLocker Drive Encryption.

## Have confidence students are protected with industry-leading security

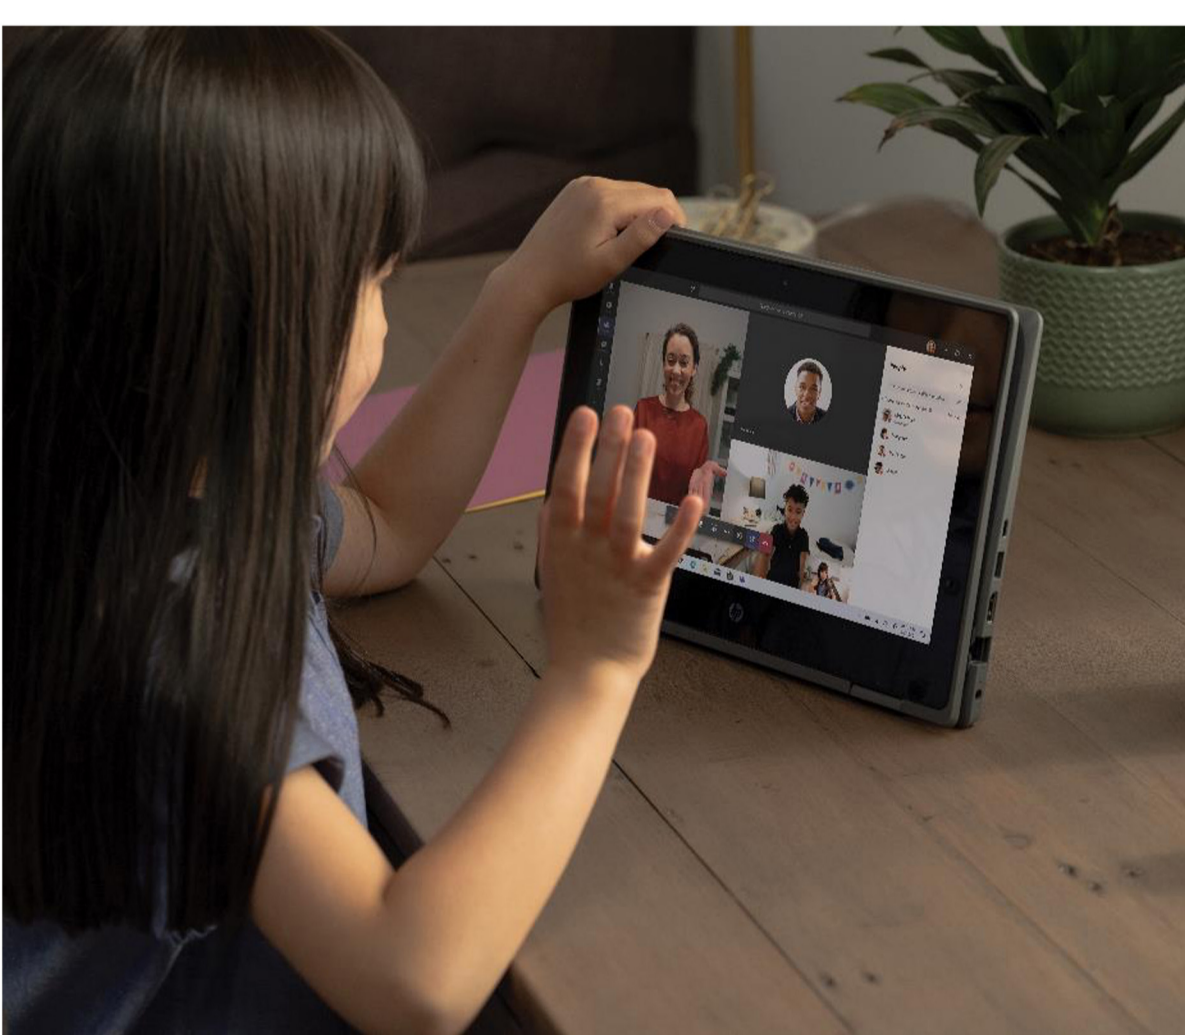

**Identity management.** Enable multi-factor authentication to secure your school against breaches due to lost or stolen credentials.

**Defend against malicious threats.** Protect students and educators from threats in emails, links, and collaboration tools with Microsoft Defender for Office 365.

**Manage identity access policies.** Microsoft Intune for Education makes it easy to manage users, data, and devices with a single dashboard.

**Have confidence apps are safe.** Windows 10 apps are curated and proactively checked for dangerous code before they enter the store.

## Enable inclusive learning in one place with Microsoft Teams

**Create collaborative classrooms.** Help teachers create a multi-modal, safe and engaging experience to support learners whether they're at home or in the classroom.

**Improve student outcomes.** Personalize learning by assigning tailored lessons and providing transparent feedback in a single system.

**Engage everyone in learning.** Support students of all abilities with accessibility tools, live caption translation, Immersive Reader, and more.

**Access all the tools you need in one place.** Integrate with apps, including Learning management systems (LMS), to manage assignments, track grades, and more.

## Empower students with devices built for learning anywhere

Help students engage with their teachers with a built-in noise cancelling microphone and a front-facing webcam

Keep students productive with cell-enabled devices that work online and offline

Unlock multi-modal learning and creativity with Windows Ink and the ability to draw, sketch, write, and take notes

Give students devices with all-day battery life so they can learn anywhere without interruption
