

Smarter Solutions for Your Technology

Creating a More Sustainable Future
One Carrying Case at a Time!

Lenovo Accessories

Smarter
technology
for all

Lenovo

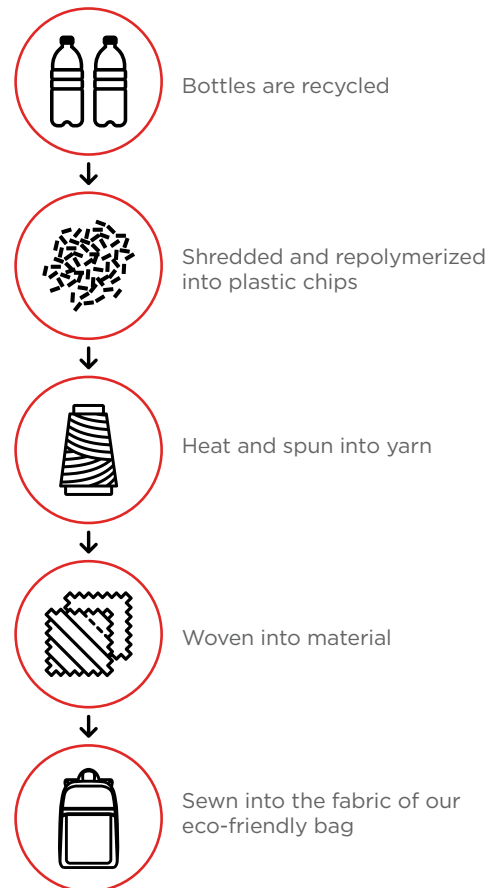

Lenovo Accessories equip and empower you to pursue your own sustainability goals

with smarter peripheral devices and workplace essentials
including carrying cases.

Our Eco collection of laptop carrying cases are made from
PET polyester and recycled water bottles, making them smart
choices for your technology and the planet.

On the journey from bottle to bag, plastic water bottles
are first shredded into small flakes. Those flakes are re-
polymerized into plastic chips that are then heated and spun
into yarn. Finally, that yarn is stitched and sewn into the fabric
of our bags.

Every Lenovo Eco backpack or topload that you purchase
helps to reduce global reliance on virgin plastic, so join us in
our journey to create a brighter, more sustainable future!
