Lenovo

Lenovo Managed Detection & Response (MxDR)

Respond to threats, seamlessly

Identify and prevent cyber attacks
to keep your data safe.

Now that's smarter.

Detect

Lenovo Managed Detection and Response (MxDR) services help you manage, maintain and curate out-of-the-box detections, combined with real-time threat analysis, to combat existing and emerging threats. Continuously develops and enriches new threat detections.

Respond

Respond with the expert Security Operations Center (SOC) analysts, to quickly investigate and respond to all escalated alerts through 24x7x365 monitoring, rapid investigation and continuous threat hunting.

Key benefits

Cutting-edge technology with ZTAP

Resolving all alerts, Lenovo MxDR is purpose-built as the industry's only Trusted Behavior Registry™ within our Zero-Trust Analytics Platform™.

Security tools integration

Lenovo MxDR helps you simplify and curate threat intelligence with leading services. It enables you to reduce your volume of alerts by integrating with multiple security services, including endpoint, SIEM, XDR and identity.

Full cross-stack capabilities

Lenovo's skilled security experts gain a deep understanding of your environment. We adapt and scale MxDR to your organization's existing ability to detect, investigate and respond to threats specific to you.

MOBILESOC for full protection of mobiles

Our MOBILESOC application allows you to communicate with our SOC and execute response actions on the go.

Cyber resiliency, simplified.

Lenovo provide a comprehensive range of cybersecurity services.

Lenovo

Count on us to combat complexity

Dedicated security team

A dedicated project manager and implementation team dig in deep from the start to understand your environment, unique needs and business objectives.

Easy integrations

Lenovo MDxR easily integrates with Microsoft Defender, SentinelONE, PaloAlto, Carbon Black and Crowdstrike MDR technology.

See everything with portal-based reporting

You gain 100% visibility on every action and datapoint our team examines - so you see what our detection engineers see and all of our detection coverage.

With you all the way

The Customer Success Team is your advocate. With you at every step to provide recommendations and support as your needs evolve.

24x7 endpoint monitoring and investigation

Our SOC quickly investigates and responds to all escalated alerts through 24x7x265 monitoring, rapid intervention and continuous threat hunting.

Smarter key services

Lenovo MDxR services help you manage, maintain and stay ahead of real time threats.

Managed Detection & Response

Manages, maintains and curates out of the box detections and Indicators of Compromise (IOCs) released by the security tool developer.

Security Operations Center

Our SOC is staffed by expert analysts who quickly investigate and respond to large volumes of alerts automatically through round-the-clock monitoring and rapid intervention.

Incident Response services

Our experts provide a detailed mitigation plan to ensure you always respond rapidly to security events. With our support, you'll detect and respond to threats in one hour or less.

Why Lenovo MxDR?

Minimize the impact of cyber-attacks

Manage and curate large volumes of alerts automatically.

Resolve more than 99% of threats

Demonstrable results keep your organization safe.

Avoid business disruption with ongoing threat management

Maintain continuity by keeping your data protected.

Optimal detection and response times

Rapid response with leading times to detect and respond to alerts.

The vision is yours. Get there with Lenovo.
