

Lightning strikes, power surges. Stay protected

Lightning strikes can harm your plugged-in devices, but power spikes & drops also damage your equipment over time.

2500
Joules

Why Surge Protection?

The average home or business experiences dozens to hundreds of power surges a day. These power surges are caused by both internal and external factors, such as turning on and off large appliances or overvoltages and brownouts. Small, frequent, daily power surges cause cumulative damage to connected electronics that will shorten their lifespan.

SURGE PLUS™

Premium Protection for Your Electronics

A surge is a short-term increase in voltage that occurs when large loads are suddenly turned off or when power companies switch power distribution across grids. A Surge Protector protects sensitive electronic equipment from harmful voltage spikes and absorbs excess energy much like a sponge absorbs water. A Belkin Surge Protector will safeguard all your expensive electronics.

All Belkin Surge Protectors come with Power Filtration for Reduced Interference and a Connected Equipment Warranty.

BSV602tt	SurgePlus™ USB Wall Mount, 6-Outlet, 2-USB (10 Watts, Combined)	6

Connected Equipment Warranty (CEW)

Our Surge Protectors come with a Connected Equipment Warranty, which means we will repair or replace electronic equipment damaged by an electrical surge or lightning strike while properly connected to the Surge Protector. If your device is damaged by an electrical charge while properly connected to the Surge Protector, Belkin will repair or replace it up to its Warranty amount. See belkin.com for details.
