

# Logitech Headsets. Reliable wireless audio for every employee. No dongle required.

Discover the untethered benefits of Logitech Native Bluetooth headsets, designed for Microsoft Teams and certified for business.

## Ready. Headset. Go!

### Is there anything worse than not being able to focus on the task at hand?

Whether it's the cacophony of an open-plan office, a neighbor's barking dogs, or other off-putting noises, distraction is the enemy of workers across locations. But noise isn't the only interference. How about sound cutting out while trying to collaborate with colleagues? Or, even worse, not being able to connect an audio device at all? The options become coping with video only or being forced to get closer to a tinny laptop speaker to hear what's going on.

The chances are you or your employees will have experienced at least one of these issues, and you're not alone. Audio problems are among the most persistent barriers to seamless collaboration.

### Research shows that 85% of remote workers encounter regular disruptions, including:

Poor sound quality from computer speakers

Distracting ambient sounds at home

Loud background noise from other people

Struggling to connect headsets and earbuds<sup>1</sup>

Add to this the challenges of unreliable wireless connections and limited freedom of movement with wired devices, and the cost to productivity—and patience—is clear.

A stunning **81% of employees** say they have lost time in hybrid meetings due to technical difficulties<sup>2</sup>. For employees, these issues mean wasted time, increased frustration, and broken focus. IT teams suffer from a steady stream of support tickets that could otherwise be avoided, and businesses see productivity dips and efficiency drains.

The need for better solutions isn't just about convenience—it's a business-critical requirement to ensure every worker can focus on what matters most.

Yet, in a recent survey of IT decision-makers, fewer than 40% said their organizations equipped employees with tools to optimize audio and video performance<sup>3</sup>.

And issues like these don't only occur outside of corporate locations.

Today, **54%** of workers go into the office full time<sup>4</sup>,

and the average hybrid employee works on site 2 **(36%)** or 3 days a week **(34%)**<sup>5</sup>.

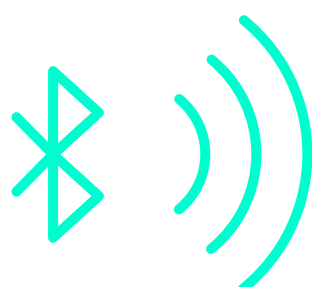

Meanwhile, **28%** of employees globally work remotely<sup>6</sup>.

It means the challenge of keeping employees productive and connected wherever they work has never been more important. Providing technology that supports employees across roles and adapts to different environments has become a pressing concern.

**But there is a solution to this problem...**

## Achieve reliability, audio quality, and seamless connectivity with Logitech Native Bluetooth headsets

The right audio solutions can make all the difference, especially for employees operating across locations. Logitech business headsets deliver high-quality audio and reliability wherever employees are based while helping to simplify the work of IT teams. Ready to meet diverse user needs, they are easy to deploy and use and are compatible with leading operating systems and collaboration platforms.

Within this comprehensive portfolio is a range of headsets that take compatibility and convenience to the next level through **Native Bluetooth Technology (NBT)**. These headsets are designed to tackle the everyday challenges of remote, hybrid, and in-office work. With no need for dongles, receivers, or additional software, Logitech NBT headsets deliver the full Microsoft Teams experience right out of the box. With Swift Pair on Windows 11, setup is a breeze: users simply select the headset, connect it, and they're ready to go.

# Logitech Native Bluetooth Technology Headset Features

## No dongle required:

Enjoy reliable connections and the full Microsoft Teams experience, with functionality such as join, mute/unmute, end calls, and raise your hand—all without additional hardware or software.

## Simplified device management:

IT teams benefit from fewer lost accessories, reduced support tickets, and freed-up USB ports for other uses.

## Improved call quality and performance:

NBT ensures better audio clarity, powered by the renowned quality of Logitech products and native Teams integration.

## Low latency:

NBT provides a more responsive experience, keeping audio and video perfectly in sync for seamless communication.

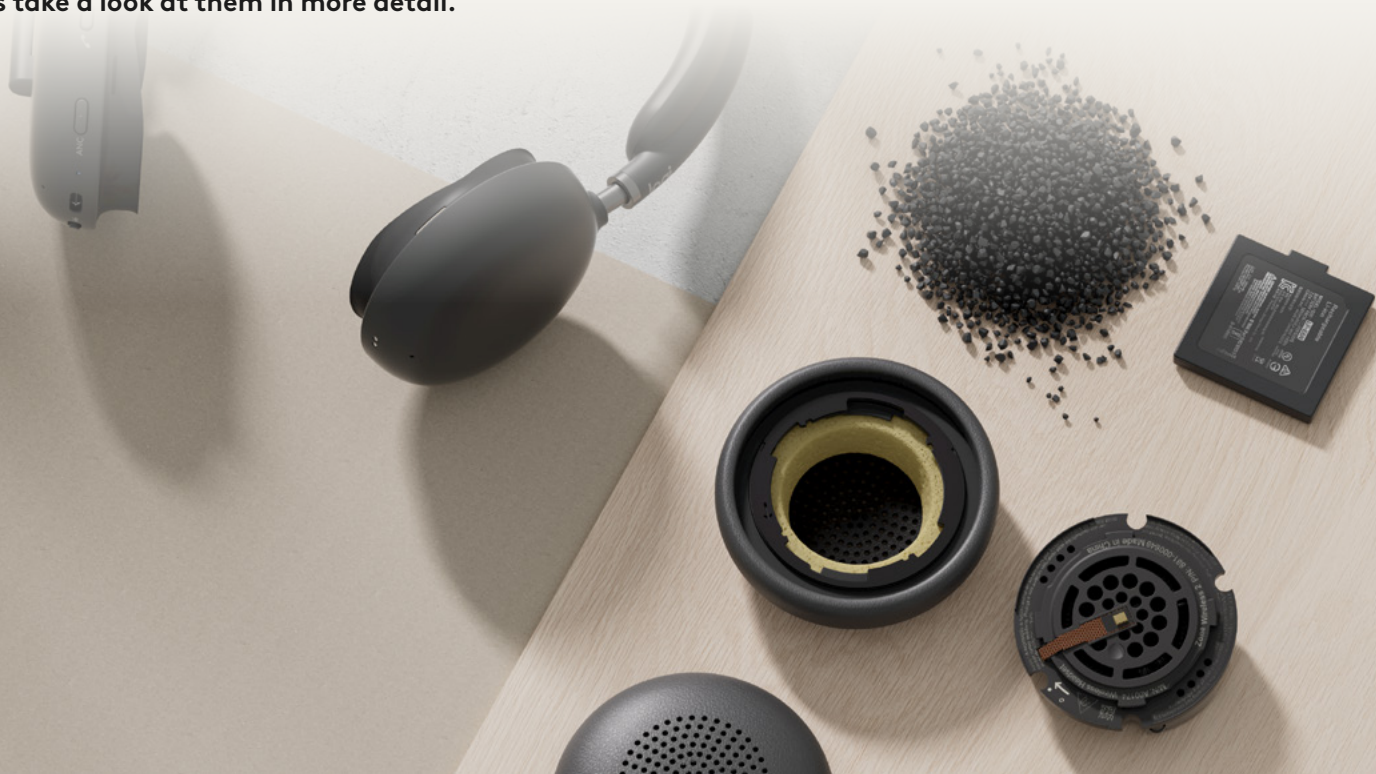

## Future-ready technology:

Certified devices remain compatible with Teams for longer, allowing organizations to benefit from future updates and features.

NBT models in the Logitech business headset portfolio include Zone Wireless 2 and Zone 305, each offering unique features to meet the needs of employees across different roles.

**Let's take a look at them in more detail.**

# Zone Wireless 2

## Pro audio for skilled professionals

Zone Wireless 2 offers a premium solution for skilled professionals seeking technology that provides superior audio quality and seamless connectivity.

### Key features

#### Native Bluetooth Technology:

Dongle-free, reliable audio quality capable of meeting the everyday needs of users with simple and seamless integration with Microsoft Teams.

#### Customizable high-quality audio:

Provides all-around stereo sound for calls, media, and music thanks to a 40 mm driver with dynamic EQ, full stereo audio range, and customization features for users with different hearing ranges.

#### Far-end noise suppression:

The Advanced Call Clarity feature uses AI to cancel background noise coming from those on the other end of a call, reducing distractions.

#### Multipoint Bluetooth and USB-C connectivity:

Improves connection reliability while allowing the user to easily switch between active audio sources (such as phone and laptop).

#### Hybrid active noise cancellation (ANC):

Blocks out ambient background noise around employee workspaces (such as air conditioning units or printers), helping employees focus with less distraction.

#### Up to 40-hour battery life:

Enough charge for a full day of worry-free use, with up to 15 hours of talk time, 22 hours of listening time, and quick charge capabilities that will give one hour of talk time from just a five-minute charge.

### Core benefits

+ **Block ambient noise** to ensure voice clarity on calls.

+ **All-around stereo sound** to provide dynamic and customizable audio ranges.

+ **Reliable and easy connections** designed for simplicity and robust plug-and-play compatibility.

### Personas

Executives and skilled professionals in specialized roles, including C-suite executives, developers, analysts, and creatives.

Regularly engaging with internal and external stakeholders, they want to sound their professional best in meetings.

Often on the move, they may work in potentially noisy environments, including at home, in the office, and at hotels and airports, making active noise cancellation and high-quality mics vital.

Spending much of their time in meetings, the ability to move around while talking or listening is important.

# Zone 305

## Essential wireless for everyday work

The Zone 305 headset is the essential on-ear wireless headset for everyday tasks, including video meetings, calls, and focused work. It is certified for business and priced for mass deployment.

### Key features

#### Native Bluetooth Technology:

Dongle-free, reliable audio quality capable of meeting the everyday needs of users with simple and seamless integration with Microsoft Teams.

#### Wideband audio with dynamic EQ:

Embedded 30 mm dynamic audio drivers with customized fine-tuned diaphragm patterns deliver great sound quality for calls and more.

#### Dual beamforming noise-canceling mics:

Attached to an extended boom with noise-canceling algorithms, background or ambient sounds are suppressed for better audio clarity.

#### Supported by Logitech Sync:

All headsets can easily be managed and kept up to date from anywhere.

### Core benefits

+ **Affordable and sustainably made**, ideal for mass deployment.

+ **Embedded 30 mm dynamic audio drivers** deliver clear audio for calls and meetings.

+ **Free Logi Tune app** enables users to adjust EQ settings and update firmware for a tailored experience.

### Personas

Workers, including those in finance, HR, and marketing, who collaborate with others across job functions.

Regularly on calls, they do most of their work on a desktop computer and need good-quality audio for clear communication.

They are likely to operate on a hybrid basis and split their time between working at home and in the office.

Less likely to use the advanced features of higher-priced headsets, they prioritize an easy-to-use product experience for day-to-day work efficiency.

## Available from a single vendor

Logitech NBT headsets form part of a comprehensive range of integrated workspace solutions and services from a single trusted vendor, enabling you to simplify procurement, management, and support.

## An NBT headset for every need

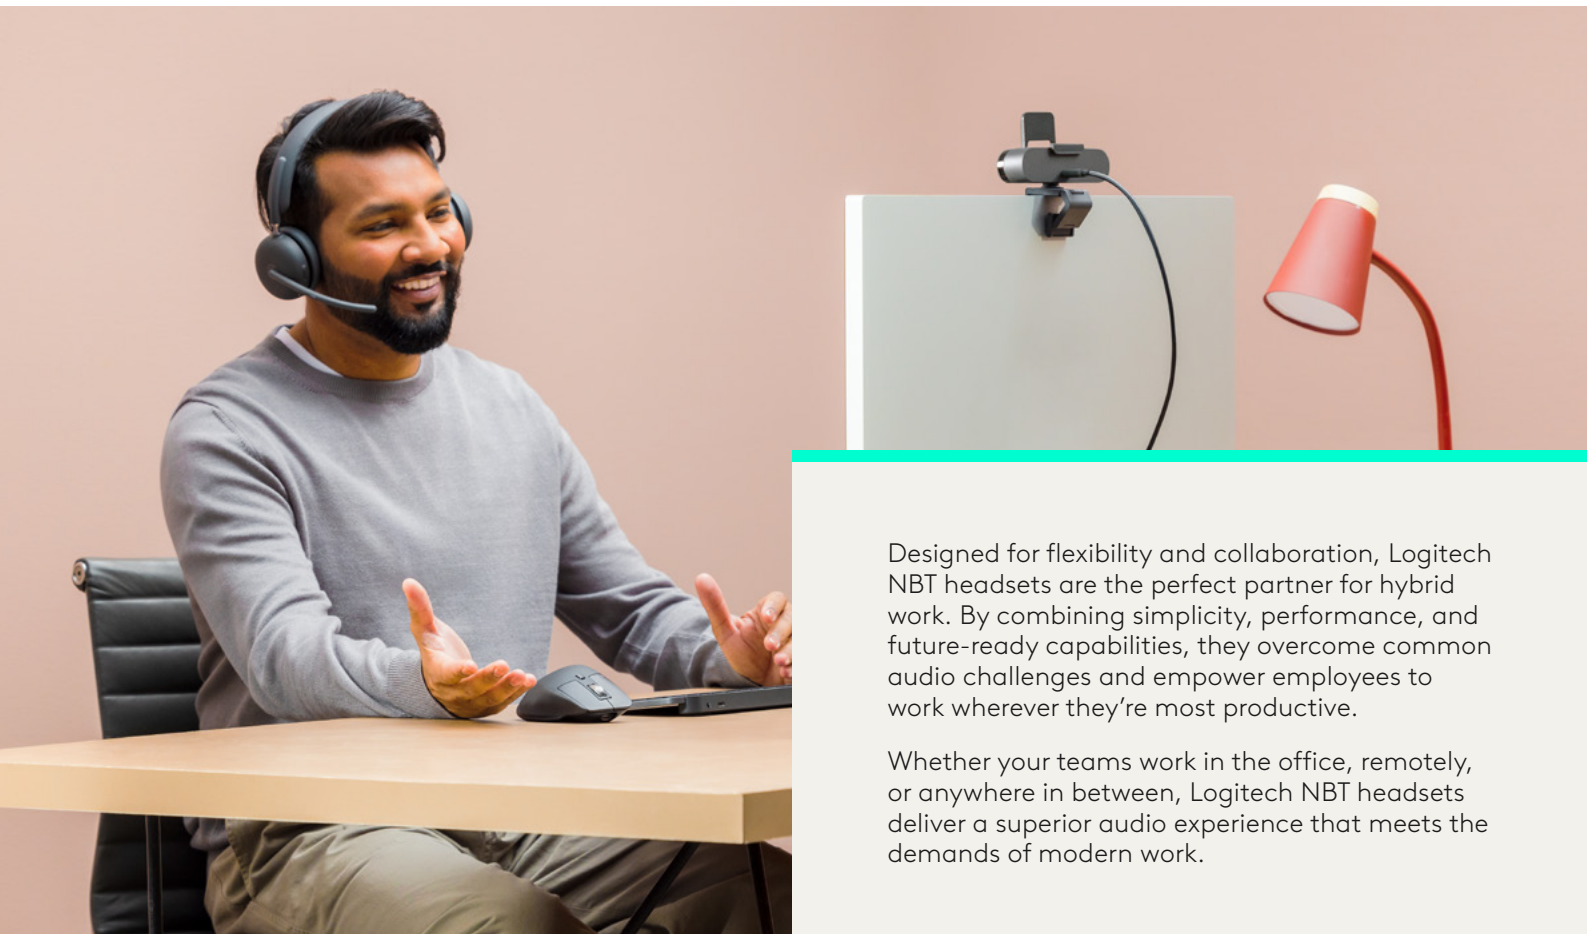

With a range of wearing styles, connection options, and price points, Logitech business headsets cater to different employee and business needs and deliver the quality and value Logitech is known for.

## IT- and hybrid-friendly

Logitech business headsets are scalable, easy to deploy, and provide long-term value. Using Logitech Sync, IT teams can monitor solutions, access insights, deliver updates, and troubleshoot problems remotely for a more efficient approach to device management.

## A choice you'll feel good about

Logitech business headsets support your sustainability goals. They use post-consumer recycled (PCR) plastic and ship in FSC™-certified paper packaging. You can even extend each headset's lifespan with replaceable parts and batteries in some models, reducing your costs while benefiting the planet.

Designed for flexibility and collaboration, Logitech NBT headsets are the perfect partner for hybrid work. By combining simplicity, performance, and future-ready capabilities, they overcome common audio challenges and empower employees to work wherever they're most productive.

Whether your teams work in the office, remotely, or anywhere in between, Logitech NBT headsets deliver a superior audio experience that meets the demands of modern work.
