# Is your current infrastructure expensive, inflexible, unreliable?

## 40%

of businesses your size cited outdated skill sets in IT as a key barrier to meeting business and technology priorities.<sup>1</sup>

## The cloud levels the playing field.

### 31%

#### Average savings with cloud

Companies that subscribe to cloud services, on average, say they save 31% compared to onsite infrastructure.<sup>2</sup>

### 69%

#### Average downtime reduction

With resiliency architected in the cloud from the ground up, you get more reliability and on average a 69% reduction in unplanned downtime.<sup>3</sup>

The clear business benefits of the cloud have made it the #1 IT priority for companies with fewer than 1,000 employees.<sup>4</sup>

- »» The highest level of cloud security
- »» Built in reliability and resiliency
- »» Real savings you can see and measure
- »» Capacity that grows as you need it
