

FLEXIBILITY OF TEACHING

Easy setup and access to educational contents, virtual/online communications, and class management. No matter it’s within the walls of classrooms or connecting remotely, portable and reliable PC devices aid the educators to design, guide, share and manage contents seamlessly.

INNOVATION OF LEARNING

Students would be able to learn and practice via unconventional ways. Physical classroom will never be the limit to interact with teachers, mentors, and classmates. Assignment discussion and learning feedback could be exchanged instantly and the advise would be obtained timely.

DEVELOPING SKILLSETS

Powerful devices would be essential when learning and practicing 2D/3D designing, programing, financial applications, science and engineering simulations and so on. Assignment planning and collaborating with the proper PC devices help develop the skillsets even further.

CULTIVATING PROFESSIONALS

All the classes and assignments are to cultivate the professionals and career path for students after schools. With the proper tools, the practice activities help build up the confidence and explore the directions. Hands-on skills can be obtained and familiarized in schools to empower for the future.

SMART LEARNING

LAPTOP - SUMMIT. PRESTIGE. MODERN

Reveal Unbounded Performance

The Modern Series features the latest 11th Gen. Intel® Core™ i7 processor, delivering stunning performance and lightweight portability which will keep you in the workflow seamlessly. Especially with Intel Iris® X* graphics, it provides uncompromised performance to empower your productivity.

*The GPU performance benchmark is based on 3D: 118607 compared to 17-108507, the result may vary by configuration.

Type Freely and Comfortably

The optimized 1.5mm key travel and the responsive feedback of each keystroke on the Modern series makes the typing experience more ergonomic. The backlit keyboard illuminates the keys brilliantly so you can easily record your passionate things in dimly lit situations.
