

MAXIMIZE YOUR WORKSPACE

AT HOME WITH DISPLAYS & ACCESSORIES

DISCOVER 5 WAYS TO MAXIMIZE ANY WORKSPACE AT HOME WITH THESE TIPS

In a March 2020 HP Survey, 96% of office employees are at home now due to the COVID-19 pandemic.¹ With the majority of the global workforce transitioning from the office to a home workspace, we are faced with a new set of challenges, trying to balance pets, family, and work in our new day to day. Whether you live in a small apartment or have a dedicated home office, the size of your workspace may differ but the key to working from home is figuring out how it can work best for you.

TIGHT QUARTERS? DESIGN A WORKSPACE TO HELP SEPARATE WORK AND PLAY

Not all homes have dedicated spaces for a full-size desk, secondary display, keyboard and mouse. To get the most out of the space you have, try to repurpose an existing area, like the kitchen table or living room coffee table, to help distinguish work time from free time. Your new commute may be from your workspace to the couch but by assigning a specific area for work, it mentally allows you to “leave the office” at the end of the day.

Space-Saving Accessories

HP USB-C® Mini Dock is a pocket-sized and portable universal docking solution that connects all of your devices without taking up space.

HP Wireless Keyboard offers high responsiveness without the fuss or clutter of cords.

HP Bluetooth Travel Mouse has an advanced sensor that enables you to work on any surface for quick transitions around the house.

PRIORITIZE WELLBEING AND ERGONOMICS

Schedule intermittent mental and physical breaks throughout the day for yourself. Being online at all hours doesn't mean you'll be more productive. On the contrary, "static sitting can cause slowed metabolism, neck pain, back pain and reduced concentration, impacting mental and cognitive abilities".²

The [HP EliteDisplay E243 Monitor](#) includes 4-way ergonomic adjustability which helps provide comfort throughout the day.

Enjoy lasting relaxation while you work and play with the [OMEN by HP Citadel Gaming Chair](#), which features extra thick cushions, full spinal support, adjustable seat height, tilt angle, and built-in neck and lumbar pillows.

Ergonomic accessories such as the [HP Wireless Keyboard and Mouse 300](#) will provide comfort throughout the day with the built-in palm rest.

SHARING YOUR SPACE? MULTIPURPOSE TOOLS WILL HELP CLEAR THE CLUTTER

One way to utilize the space you have is to invest in only a few tools that everyone in your house-hold can use for work and play to decrease the number of devices overall.

[OMEN by HP Mindframe Prime Headset](#) with FrostCap cooling technology, passive cooling earcups, and environmental noise canceling mics this headset is perfect for long gaming sessions or marathon conference calls.

From school nights to movie nights, the [HP Pavilion 27q 27-Inch QHD Monitor](#) turns all your home entertainment into an expansive experience the whole family can enjoy. Study, work and play with a monitor that offers QHD resolution and ultra-wide viewing angles. Recently named "[The best monitor for working from home](#)" by Tech Radar.

For quickly charging multiple devices at once, the [HP USB-C® Notebook Power Bank](#) is HP's highest capacity power bank designed to keep you up and running when a power outlet is unavailable.

With a dock, easily connect your notebook through a single cable for all of your peripherals for a full desktop experience. From the compact [HP USB-C® Mini Dock](#) to the [HP Thunderbolt Dock G2 120W](#) there's a docking solution that fits your workspace.

If you're tight on space but still want the full desktop experience, the [E27d Docking Monitor](#) has universal docking capabilities and a webcam built into the monitor, to always keep you connected.

[HP Tango Printer](#) is designed for families and other home users who want a device capable of printing everything from documents, email and web pages to rich, bright lab-quality photos - with copy and scan tools too.

KEEP YOURSELF DIGITALLY SAFE

COVID19-related domains are 50% more likely to be malicious than other domains registered at the same period, and higher than recent seasonal themes, such as Valentine's Day.³ Practicing good digital hygiene helps protect users and organizations, by influencing VPN connectivity and eliminating public Wi-Fi will decrease malicious threat access. However, threats can still reach your organization through other vulnerabilities, like email, the web, and social media. To eliminate these threats protect your organization with HP Elite and Pro PC's, including industry leading security features to help protect the operating system. **HP Sure Start** helps protects from firmware attacks, providing a self-healing BIOS capability. **HP Sure Click** helps protects from phishing attacks, an increasingly high targeted activity that follows a bait-and-trap pattern. **HP Sure Sense** helps protects against malware backdoor attacks targeting your broader organization. **HP Sure Recover** enables remote PC restoration in minutes, returning employees to full productivity. **HP Sure View**, the industries most advanced integrated privacy filter, protecting from prying eyes wherever your employees are working.

CLEAN YOUR WORKSPACE OFTEN

Within your home, multiple users may be using the same workspace throughout the day. Remember to clean often and to use the proper guidance to help make sure your products are disinfected.
