

Modern devices for government

With accelerated digital transformation, empower government officials and employees with a device portfolio that enables new AI experiences and secure productivity from anywhere.

Today's workplace requires modern and secure devices that enable new AI experience and work seamlessly with modern communications and collaboration tools to empower government employees to work and connect with colleagues and citizens from anywhere.

Microsoft Surface for Business offers a versatile device portfolio with industry-leading security to empower government workers to work from anywhere while transforming core processes to better serve citizens.

Light, versatile, powerful, and AI ready, Surface devices deliver a premium experience that fits the needs of all government personas, from frontline workers (police, fire, emergency, inspectors, case workers) to government officials (city planners, judiciary, legislators, treasurers) and back-office staff.

"We piloted the devices with our technology champions across the organisation, so we had a view from our user base – and Microsoft Surfaces were the preferred devices."

Sarah Moore – IT Transformation Manager, [Somerset County Council](#)

Surface devices with Windows 11 and Microsoft 365 help empower digital transformation in government organizations with:

Productivity, collaboration, AI

Experience the best of Microsoft—Microsoft 365, Dynamics 365, Azure, Windows 11, and Microsoft Copilot¹—on a Surface device. Surface + Microsoft Teams enable crystal clear meetings with high-end cameras, optimized microphones, and quality speakers. Enhance collaboration with AI-capabilities on Surface AI PCs and Copilot+ PCs.²

Cloud-managed devices

Enable work from anywhere while keeping control with zero-touch deployment and seamless device management. Dispersed workers just unbox and log in. Surface + Microsoft 365 gives employees the freedom to work their way and protection by the best modern security and manageability platform from Microsoft.

Chip-to-cloud security

Security is built into every layer, from the supply chain to the firmware to the operating system, helping to keep data safer than ever. Surface powered by Microsoft 365 helps improve enterprise security. Secured-core PCs, available on the latest Surface devices, are designed to elevate the benefits of Windows 11 security.
