

Infrastructure Flexibility & Agility

 Backup and Recovery

Backup and Recovery Built for Tomorrow

Lenovo

Lenovo's scalable Backup and Recovery solution streamlines costs.

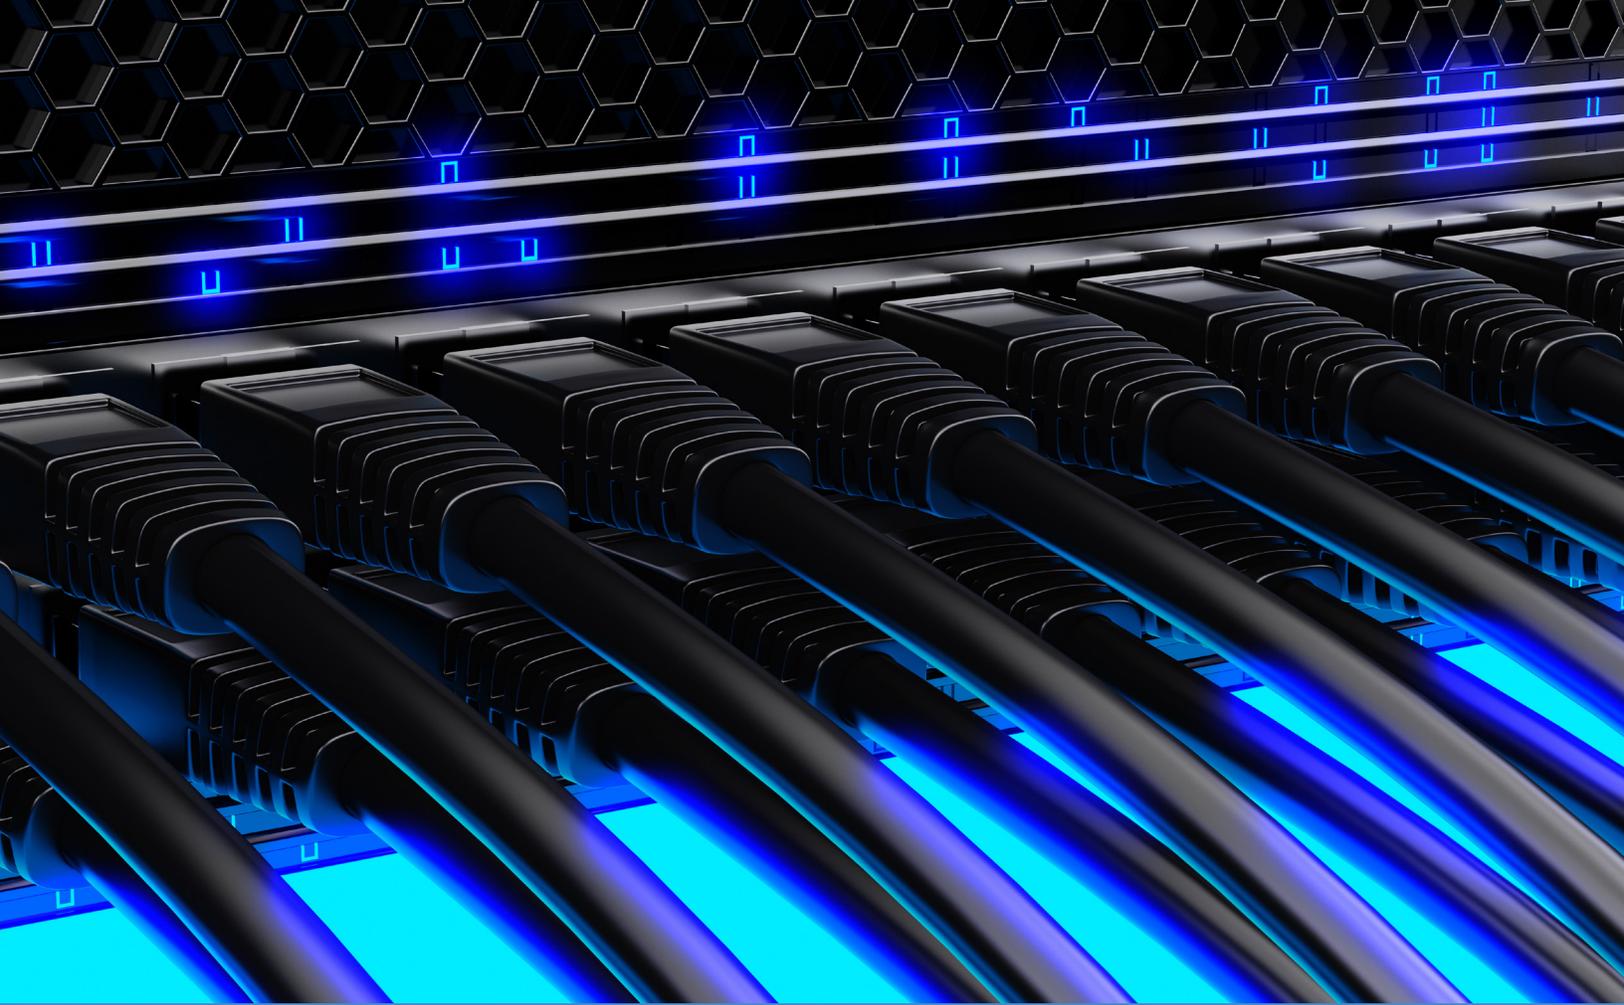

Every business needs a reliable backup and recovery strategy. Lenovo's new enterprise-class data protection solution leverages the best mix of leading servers and software to provide intelligent, cost-effective protection with flexible, cloud-based remote recovery. Plus, the optional "pay as you grow" structure keeps pace with your goals, scaling to fit your growth needs.

Reimagine Backup and Recovery

You can't avoid bad days, but you can plan for them. Be prepared for whatever's around the corner with a better solution for essential backup and recovery. Lenovo Backup and Recovery leverages industry-leading software to help you trim costs, reduce your footprint, and enjoy peace of mind with secure backup, recovery, and storage that can be accessed anytime, anywhere.

- Reduced storage costs and footprint
- Accelerated backups for better RPO
- Secure, transparent cloud tiering and intelligent cloud recovery
- Cloud-connected for easy off-site backup storage
- All-inclusive licensing with scalable "Pay as you Grow" option
- Fully tested to run on Lenovo ThinkSystem platforms
- Secure global management from anywhere on anything

The Power of Protection

Old-school approaches to backup and recovery eat up space and resources. In contrast, Lenovo's new lean, innovative software-defined Backup and Recovery solution brings together enterprise-class features at exactly the scale you need.

Hardware

- Lenovo ThinkSystem Servers (different HW configurations)

Software
