Enhance Communication and Ensure Safety

Samsung XPR-B outdoor LED displays can convey various safety precautions, emergency care info, and what patients should expect when they arrive at healthcare facilities. Additionally the displays can be integrated in to a mass notification system that can relay weather, COVID-19, and other safety alerts.

Build a Community

Community involvement is essential for healthcare. An XPR-B LED display will improve your outreach by promoting health awareness and services to the surrounding community. Remind your community about sun safety, allergies, and flu shots. Advertise preventative health seminars and educational events.

Clear Timely Communication

Samsung XPR-B outdoor LED displays keep announcements rotating making it easy to provide ER wait times, visiting hours, way-finding information, events, advertisements of services and more.
