LENOVO BACKUP AND RECOVERY SOLUTION

Guard against external and internal threats while reducing costs

Preventing against data loss and complying with various government regulations are major challenges for any business. The Backup and Recovery solution from Lenovo can help you back up your data on-premises or to the cloud faster and more securely while reducing costs.

Streamline, simplify, and automate data protection across diverse, hybrid multi-cloud environments with Lenovo's Backup and Recovery solution. Avoid productivity disruptions, fines, legal actions, and potential damage to your reputation by protecting your data with industry-leading, readily available, and quick-to-deploy technology.

62% **Ransomware attacks are up 62%, according to the FBI.**[1]

Hardware

- Lenovo ThinkSystem servers
  - The most reliable x86 servers in the world
  - Over 240 #1 performance benchmarks
- Unmatched value, flexibility, and industry-leading efficiency with Intel® Xeon® Scalable processors

Software

- **Quest® QoreStor.™** Industry-leading software-defined secondary storage
- **Veeam Backup & Replication.™** Industry-leading backup and replication software

Right tools provide performance and peace of mind

Lenovo's Backup and Recovery solution accelerates and optimizes backups, providing a smarter, more efficient way to protect your organization's data from edge to hybrid cloud. These industry-leading tools are easy to manage, simple to deploy, and scalable. As a result, you reduce your infrastructure costs, improve data availability, and accelerate performance.

- Reduces on-premises and cloud backup storage capacity requirements by up to 95%, lowering costs
- Accelerates backups up to 20 TB per hour for better recovery time objectives (RTOs) and recovery point objectives (RPOs)
- Shrinks replication window by up to 15 times by transmitting only changed data
- Reduces network bandwidth requirements by up to 85%
- Provides easy offsite backup storage via connected cloud
- Reduces egress costs with intelligent cloud recovery
- Ensures bulletproof ransomware protection
- Meets your service level agreements (SLAs) with confidence

The Lenovo Backup and Recovery solution is ready to ship today and add value to your organization. And it's also available as a service through Lenovo TruScale,™ giving you added flexibility to meet evolving business needs and reduce upfront costs.
