

Promotions for Remote Network Access

Help enable secure remote network access for your employees to work from home with these offers. Get a no-cost Cisco Catalyst 9800-CL Wireless Controller for Cloud, use a no-cost Cisco wireless LAN controller evaluation license for 90 days, and take advantage of new Cisco 1000 Series Integrated Services Router (ISR) bundles.

- [Remote network access using Wi-Fi](#)
- [Remote network access using WAN](#)

Cisco has solutions for remote network access that can be deployed quickly and that use your existing infrastructure. Take advantage of offers that can help you deploy and scale those solutions:

- No-cost evaluation licenses for Cisco wireless controller software for 90 days
- Cisco [Catalyst 9800-CL Wireless Controllers](#) for Cloud at no-cost
- New [Cisco 1000 Series ISR](#) bundles designed for remote work

Remote network access using Wi-Fi

Setting up remote workers can be as easy as using your existing Cisco Catalyst or Cisco Aironet access points in OfficeExtend mode. With this option, you may need software licenses for your wireless controller or need to set up a new one. Below, you'll find information on how you can obtain a software license or wireless controller software.

No-cost evaluation license for Cisco wireless controller (90 days for either Cisco AireOS or Cisco IOS-XE based wireless controllers)

This offer supports the maximum access-point limit for the wireless controller platform. No access point count license is required for Cisco Mobility Express or autonomous mode access points.

Find out how to set up an evaluation license for wireless controllers based on [AireOS](#) or [IOS-XE](#).

Cisco Catalyst 9800-CL Wireless Controller for Cloud at no cost

Get Cisco Catalyst 9800-CL wireless LAN controller software at no cost, in addition to a 90-day evaluation license. Both offers support the maximum access-point limit for the wireless controller platform. No access point count license is required for Mobility Express or autonomous mode access points.

Find out how to [download the wireless controller software](#) or [set up the evaluation license](#).

Remote network access using WAN

You can also set up a connection from a virtual office, which could be in an employee's home or another remote location, such as a microbranch office. Cisco offers four bundle options using the Cisco SD-WAN-ready Cisco Integrated Services Router (ISR), cellular modules, and a Cisco SD-WAN subscription. These bundles reflect an additional 14 percent discount compared with purchasing the components separately.

Cisco Virtual Office solution

With this solution, you can quickly set up a teleworker in a virtual office without the need for onsite provisioning. This offer includes a Cisco Virtual Office license.

SKUs:

- ISR1000-4P-TWPM20 (4-port option)
- ISR1000-8P-TWPM20 (8-port option)

Microbranch solution

This connectivity option provides more-robust capabilities and greater flexibility for redeploying the solution later, once the temporary microbranch is no longer needed.

SKUs:

- ISR1000-4P-MBPM20 (4-port option)
- ISR1000-8P-MBPM20 (8-port option)

Offer details

These offers are available globally and are valid through October 24, 2020.
