

# Unlock the hidden potential of your screens

Airtame is revolutionizing the way teams connect and engage with screens. The Airtame platform offers innovative solutions for hybrid video conferencing, digital signage, and wireless screen sharing. With Airtame, everyone can share, learn, and connect on equal footing, no matter their preferred service.

## What we provide

### Digital Signage

Show relevant information when you want with custom schedules.

### Screen-sharing

Share content from any device at the click of a button.

### Hybrid Conferencing

Have efficient virtual meetings in your rooms where everyone is heard.

### Remote management

Easily bulk control all screens from a central management system.

## What we offer

### All-in-one vendor

The Airtame platform transforms screens into a multipurpose portal for sharing and engaging.

### Breathing life into screens

Make your organization full of life and personality with beautifully branded content instead of idle black screens.

### No cables, no wasted time

Enjoy a one-click wireless solution and save time with every call and screen-sharing session. No more dongles and cables.

### Keep people informed

Share your existing slides, webpages, photos, and videos with custom playlists.

### Share your content

Share your screen or window with audio for increased awareness from your audience.

### Smooth hybrid calls

A hybrid conference call which simply works with Plug'n'Play camera and audio peripheral support.

### Digital Signage:

- Tailor playlists
- Design Digital Signage through integration from Google, Microsoft, and others. Show external URLs
- Display meeting room availability & room scheduling
- Host a Welcome Screen with custom icon and background
- Real time overview of screens
- Display in 4K signage Airtame Hub only

### Screen Sharing:

- Share windows or whole screen
- Utilize Native protocols (Miracast, Airplay, Google Cast), powered by AirServer
- Share video and audio

### Remote Management:

- Access devices from anywhere
- Schedule power management
- Schedule firmware updates
- Activate Device Alerts
- Free firmware updates

### New Features:

- Share to Call: Local participants can join the meeting without joining the call
- Share from Browser: allows a user to wirelessly share their screen directly from a web browser without having to install the Airtame application on their computer

### Hybrid Conferencing:

- Host Calls from Microsoft Teams, Google Meet, Zoom & Webex
- Audio and video peripheral integration
- Share your screen to the call without joining the meeting
- Meetings are hosted through Airtame, no battery drain on your computer or video latency with PoE capabilities.

### Other:

- Top-Tier Customer support
- Hardware warranty
- On-demand training
