Accelerated Migrations

Keep your timelines on track with accelerated on-prem to cloud or tenant-to-tenant migrations with out-of-the-box usability and high-performance data transfer deployments.

Move faster with a true out-of-the-box solution that is easy to deploy and use. No scripts required!

Streamline effort using a single tool for all migration workloads: SharePoint, Teams, Exchange, Planner and more.
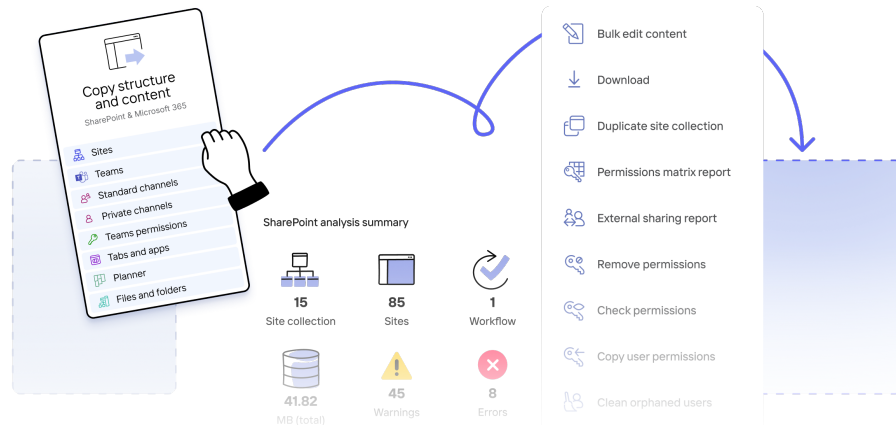

Meet deadlines by accelerating data transfer deploying multiple machines to run concurrent migration tasks.

Multiple activations optimize effort distributing workloads across the team: project managers do planning & strategy, infrastructure drive mailbox migration, operations migrate, and security teams govern.

ShareGate integrates Microsoft directives with automated policies and the Azure ShareGate app to effectively mitigate throttling and ensure optimal data transfer speed.

Modernize with confidence

Preserve the integrity of your data with every move while you transform with configurations that meet the needs of your unique environment.

Granular control and configurations ensure your unique company IT requirements are met.

Lift and shift in one shot or simple filters specify objects, structure, mapping to align with any migration strategy.

Custom reports pinpoint the exact parameters to migrate or administer your environment to your specifications.

Automated and configurable mapping ensures your people migrate seamlessly according to your strategy.

Maintain critical visibility and control with centralized, deep dive permissions discovery and granular or bulk adjustments.

The ShareGate PowerShell module enables advanced configurations for sequencing and mapping.

Migrate everything intact:

SharePoint

Sites, subsites, lists, libraries & their content, content types, document sets, structure, site navigation, managed metadata, versioning, permissions & levels, list items, list views & forms, list attachments, SharePoint groups, workflows, site columns, web parts, user alerts

Teams

Teams teams, standard & private channels, team conversations, team permissions, tabs & apps, Planner, files & folders, associated SharePoint site
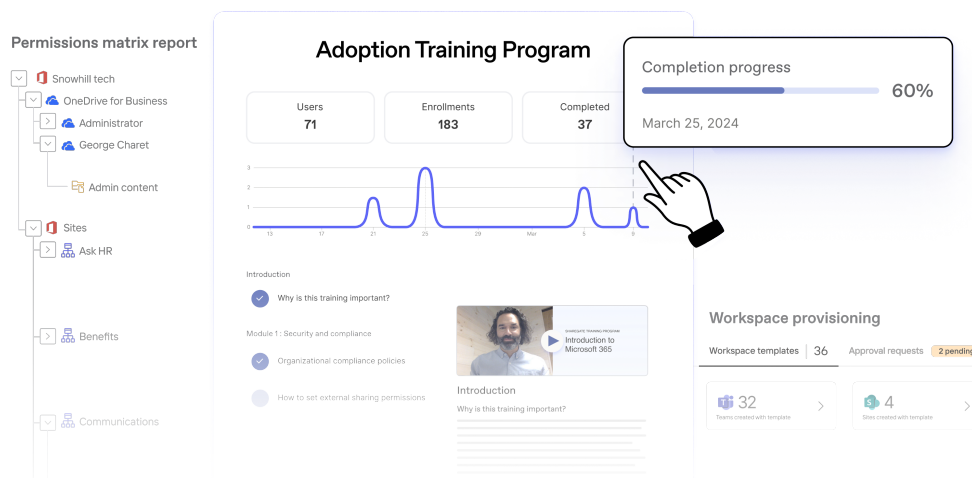

Exchange

Personal mailboxes, shared mailboxes, messages, calendars, contacts, calendar events, message & calendar attachments, folders (excluding public folders), categories, flags, importance, server-side rules

Planner

Plans, tasks, buckets, members, assignments, views, comments

Leave no best practice behind

Ensure the end-to-end success of your migration project from planning assessment tools to access management and turnkey Microsoft 365 end-user training.

Migrate with best practices built in across every stage of your migration journey: from discovery through adoption.

Reports include quick actions to simplify administration with bulk edits to metadata, permissions, settings and more.

Protect your new environment and its data with controlled management for external sharing and inactive workspaces.

A complete migration assessment toolset centralizes discovery and elevates your strategy.

Turnkey Microsoft 365 end-user interactive training accelerates adoption across your entire organization.

Deploy future-proofed governance with workspace provisioning templates.

Pre-built reports that go beyond core migration needs: Checked out documents, external sharing, orphaned sites and users, and the Permissions Matrix Report.

Measure adoption from environment hygiene to end-user training reports.

Source	Destination
SharePoint 2003, 2007, 2010, 2013, 2016, 2019 SharePoint Online File shares: local and shared drives OneDrive for Business Google Drive Box	SharePoint 2010, 2013, 2016, 2019 SharePoint Online SharePoint Server 2010 OneDrive for Business
Microsoft Teams	Microsoft Teams
Exchange Online	Exchange Online
Microsoft Planner	Microsoft Planner

Everything you need for fast and secure migration, adoption, administration, and governance.
At one fixed price.

✅ No data caps   ✅ All workloads   ✅ Unlimited support   ✅ Infinite end users

Unique licensing that enables high-performance concurrent migrations at an affordable price.

No additional license surprises or unexpected add-ons with fixed license plans to cover your migration from start to finish.

Fixed costs with unlimited end-users and no data limits.

Unlimited support from technicians committed to your success.

Best-in-class customer success including community events that connect IT peers to level up learning and experience.

Do more with less working with a single tool for all your migration workloads.

> *I have led migrations for global entities over the years and have used every migration tool out there. ShareGate is easy to use and your great support staff consistently solve our advanced technical issues which is why I will always use ShareGate to manage my SharePoint environments.*
