

When it comes to doing business, we care about what you care about.

Let us sort through the complexity of technology so you don't have to.

Cisco helps small businesses accelerate teamwork, fend off cyberattacks and seamlessly increase productivity among employees.

Meet Dina, CEO of a growing business with 100+ employees in offices throughout the country.

With employees in different locations, it's challenging for Dina to keep everyone on the same page and aligned with the ever-changing needs and goals of her clients.

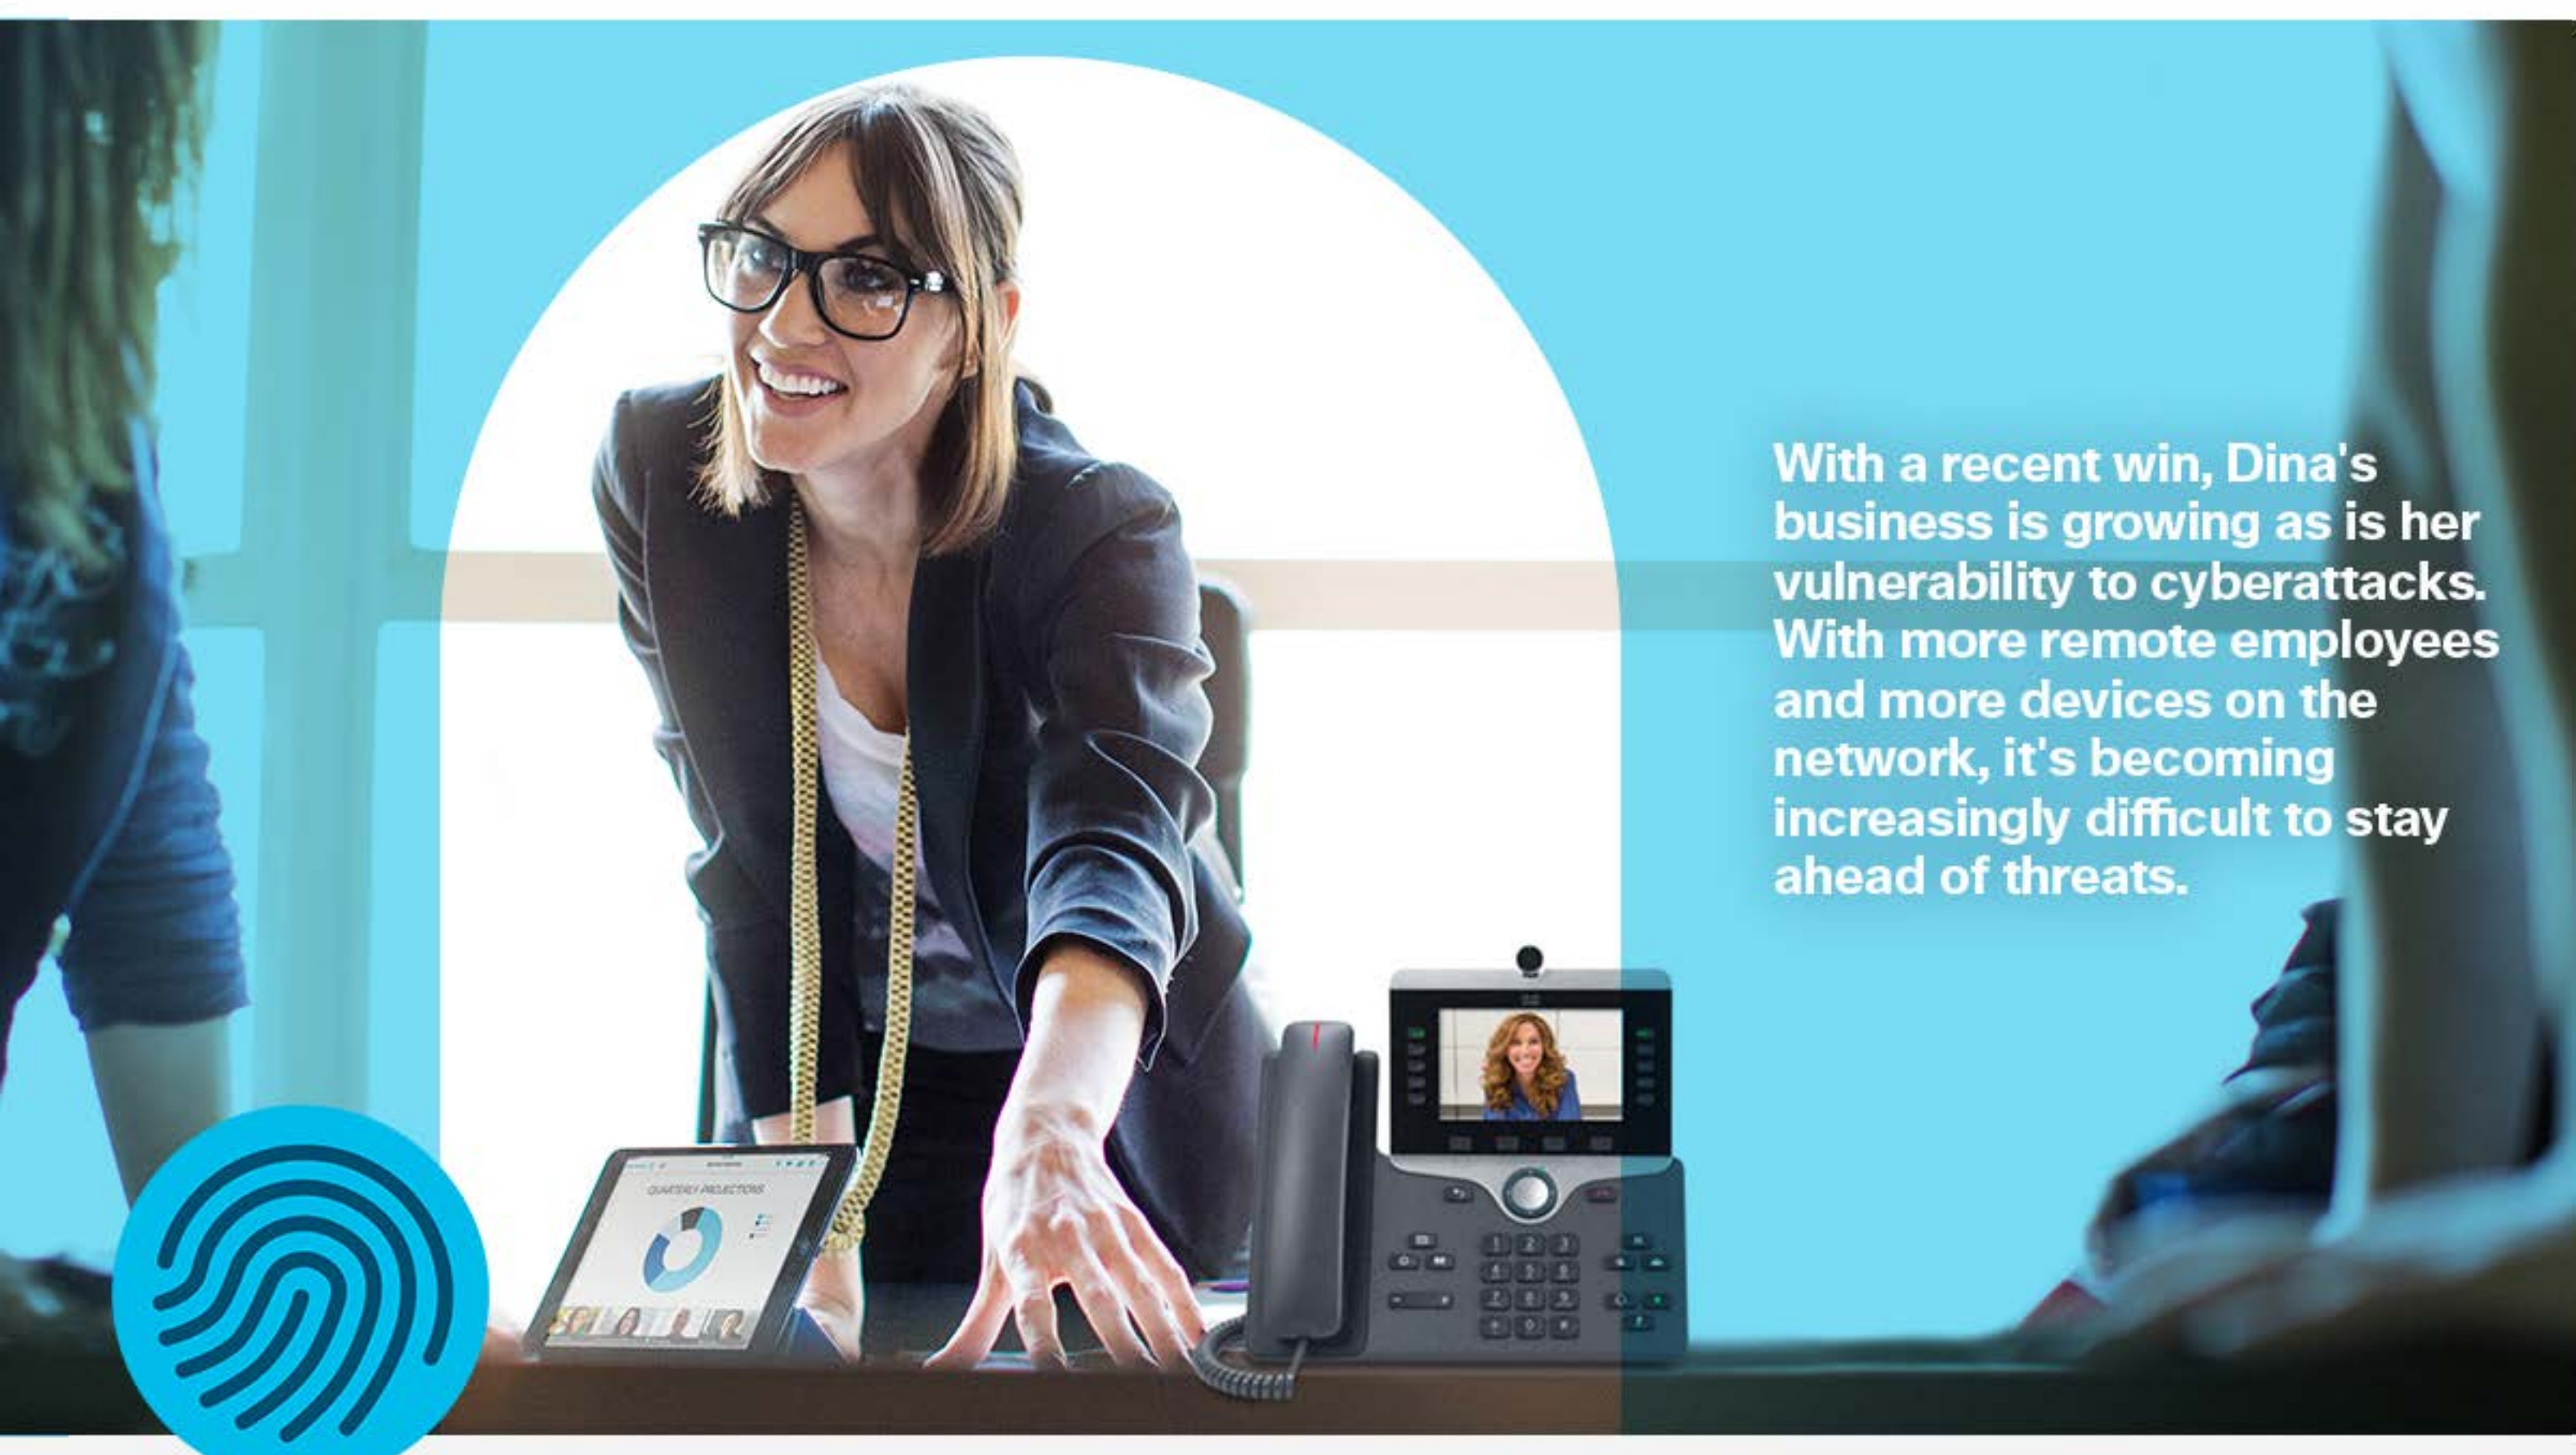

How is she still focused on producing great ideas?

Because Cisco is there to bring people together.

Solutions that connect people: phone systems to video conferencing to all-in-one team collaboration solutions help teams communicate in real time and keep clients updated.

See what Cisco's collaboration solutions can do for you.

With a recent win, Dina's business is growing as is her vulnerability to cyberattacks. With more remote employees and more devices on the network, it's becoming increasingly difficult to stay ahead of threats.

How is she still celebrating?

Because Cisco is there to protect her.

With security solutions that work on site, across the network, and on every device, Cisco detects threats and blocks them outright.

Dina's business is rapidly expanding, with three more locations set to open in less than a year. It's challenging for her to keep up with the growing demands of her employees and clients, with the added pressure of time and budget to get up and running.

How is she still smiling?

Because Cisco is there to take it on.

With simplified network solutions that keep everyone and everything in Dina's business seamlessly connected - at the head office, at home and on the go. Scaled to fit her needs, her network requires minimal effort to set up and manage, so there's more time to focus on the next big idea.
