RAM Mounts Drives Smart Factory Efficiency with Mobile Technology

IN VEHICLE | DISPATCH CENTER | WAREHOUSE | RETAIL | MANUFACTURING | INVENTORY

“When changes have to be made to an order, we no longer have to track down a piece of paper, we just pull up the order on the tablet and make changes right in the system.”

—**Jake Parker**
Director of Business Development
RAM Mounts

BACKGROUND

The team at RAM® Mounts struggled with systemic process inefficiencies and the inability to properly scale dated systems. From human resources to customer relations, paper solutions were no longer working. Management decided it was time to move away from old processes and toward a lean manufacturing model.

GOAL

Following an exhaustive internal review, management identified a need for paperless tracking, particularly for: payroll management and time clocks, assembly line, warehouse management, scheduling and CRM for sales. The goal was to eliminate waste and process inefficiencies by leveraging Samsung devices and systems.

SOLUTION

Samsung worked with the client to deliver a comprehensive overhaul of processes and move toward a smart factory. A fleet of ruggedized tablets updated various functions and systems including payroll, the order system, warehouse management and scheduling, while the sales team leverage Samsung smartphones to keep ahead of CRM interactions while on the road. The systematic switch to a paperless solution has driven new operational performance standards.

Samsung Rugged Tablets

From HR functions to tracking orders on the assembly line to managing customer requests and warehouse operations, Samsung rugged tablets slashed inefficiencies.

Samsung Smartphones

Samsung smartphones keep internal teams on track and empower sales professionals to complete CRM functions on the road to keep business moving.

RESULTS

The deployment of Samsung tablets and smartphones across the factory—from time clock punching to the manufacturing assembly line, warehouse management and CRM functions—has ushered RAM Mounts firmly into lean manufacturing. Plant personnel now have greater transparency into the production process, and there is no unnecessary duplication of order transactions. Principals confirmed that the paperless solution using Samsung mobile technology has led to increased employee productivity and more agile operations.

Samsung Windows PC

Ensure your team's very best from anywhere

The Galaxy Book2 Business is designed for a hybrid world, meeting your needs, even on the go. This powerful PC, built on the Intel vPro® platform, enables enterprises to create and collaborate from anywhere with defense-grade security features and advanced productivity capabilities integrated from within. Conquer the new reality of the hybrid work environment by seamlessly connecting across teams and devices to finish important projects, stream critical content feeds and more.

Key Features

- 14" FHD, anti-glare display
- AMOLED screen
- PC power in a smartphone-thin frame
- Best-in-class, defense-grade security at every level
- IT deployment and decentralized device management
- Studio Mode for seamless video conferencing
- IR camera and facial detection allow for easy but secure access
- Sync with smartphone apps for seamless crossover between devices
- Quick Share feature allows users to instantly collaborate with others from anywhere

Available Models

- Galaxy Book2 Business
- Galaxy Book 3
- Galaxy Book3 Pro
- Galaxy Book3 Ultra
- Galaxy Book3 360
- Galaxy Book3 Pro 360

Samsung Outdoor LED Displays

Easily broadcast important information

The right technology keeps everyone informed, wherever they are. Samsung outdoor LED displays are designed to be energy efficient, low maintenance and come complete with a simple, web-based content-management solution allowing enterprises to disseminate information quickly and easily, while keeping costs down. You can broadcast daily updates, emergency messages and more to quickly share information with dispersed teams. Additionally, Samsung cloud-based controls make it easy and convenient to manage your content from anywhere.

Key Features

- Exceptional picture quality with high visibility
- Built to withstand all weather
- Multiple operational safeguards
- Warranty and service support
- Cloud-based content
- Longer life and image quality

Available Models

- OHB Series
- OHF Series
- OHA Series
- OHN Series
- OHN-S Series
- OHN-D Series

Samsung Outdoor Digital Displays

Eye-catching visuals from anywhere

Deliver bright and brilliant messages outdoors 24/7, come rain or shine. Samsung's fully weatherproof OH series offer an all-in-one outdoor signage solution. Designed with exceptional brightness and robust, slim design, enjoy stunning displays in a convenient and durable form factor that's easy to install and operate.

Key Features

- UL-verified for high outdoor visibility in various weather conditions
- Built-in auto brightness sensor automatically adjusts to external lighting
- Tempered Magic Protection Glass with advanced anti-reflection technology and IK10-rated durability
- Samsung Crystal Processor 4K optimizes on-screen text and imagery
- Designed for businesses, OH series products are packed with robust hardware, ensuring longevity and flexibility
- Certified, IP56-rated protection
- Embedded MagicINFO Play for smooth and seamless content playback
- Three-layer security powered by Knox technology

Available Models

- OHB series
- OH Series

Samsung Touch-enabled Displays

Improved engagement, intuitive interaction

With its intuitive interface and crisp display, Samsung's QB13R-T touch-enabled device provides a distinct user experience and improves engagement among teams, customers and any other user group. Designed for professional use, the compact, 10-point, multi-touch display boasts fast response time, stunning visuals and easy-to-read content and in one sleek, versatile device.

Key Features

- 13" or 24" FHD display with 10-point multi-touch functionality
- Compact and slim design
- Embedded MagicINFO S player for seamless content playback
- Enhanced non-glare panel
- 16/7 operation, suitable for professional use
- Knox security system provides rigid, 3-layer protection
- Center IR and built-in Wi-Fi allow for easy, convenient remote control
- EMC Class B compliant
- IP5x rating ensures durability and performance

Available Models

- QB13R-M
- QB13R-TM

Samsung Ultra Smartphones

The phone that makes every day epic

With its intuitive interface and crisp display, Samsung's QB13R-T touch-enabled device provides a distinct user experience and improves engagement among teams, customers and any other user group. Designed for professional use, the compact, 10-point, multi-touch display boasts fast response time, stunning visuals and easy-to-read content and in one sleek, versatile device.

Key Features

- A PC in your pocket with Samsung DeX
- 50MP and 8K resolution to capture and record in vivid detail while in the field
- Low-light capture for key visuals or troubleshooting in dark places
- 4nm chip lets you conference, collaborate, browse and create seamlessly
- Next-level protection with Knox Vault
- Long-lasting battery powers your entire day, and if you need a boost, super-fast charging gets you back in the field quickly

Available Models

- Samsung Galaxy S23
- Samsung Galaxy S23+
- Samsung Galaxy S23 Ultra
