Secure Transfer

Cloud FastPath Data Migration

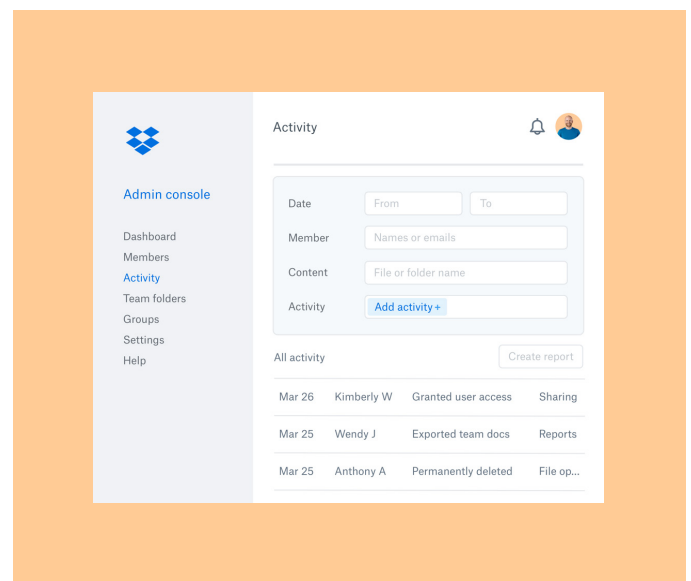

More than 500,000 businesses and organizations trust Dropbox as their secure collaboration tool of choice

Dropbox Business

Deploy a best-in-class Dropbox experience that fuels productivity and empowers you with increased visibility and controls.

- Set granular access permissions and gain real-time visibility with activity logs
- Employ remote logout and remote wipe to prevent IP loss or unauthorized access
- Integrate with best-of-breed SIEM and IAM security providers
- Access Enterprise features for securing unmanaged usage, granular classification of sensitive data, visibility into external sharing, and automated alerts

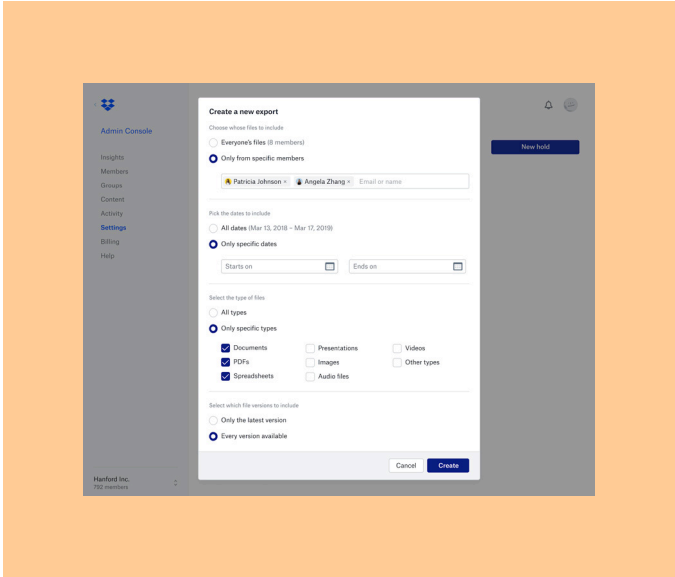

Admin console

Data Governance Tools

Leverage targeted tools to secure, retain, recover, and audit company data.

- Guarantee 1-click file recovery with 10-year backup*
- Easily access and export content for audit and compliance with legal holds
- Create policies that define how long content must be kept

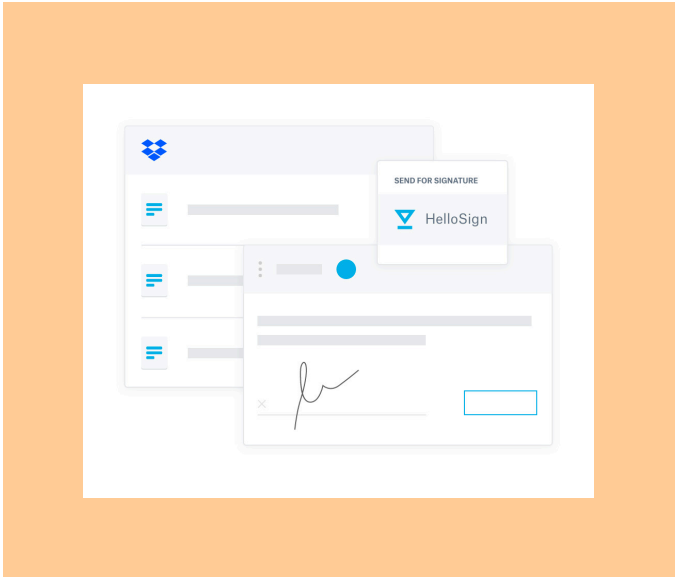

Legal holds

Secure eSignature

Request signatures and sign your most important business agreements in an auditable, enterprise-grade way.

- Request and sign documents securely
- Protect data with enterprise-grade privacy and security
- Leverage admin controls to govern teams, permissions, usage, and storage, including role-based security permissions and signer-specific access codes
- Access comprehensive audit trails

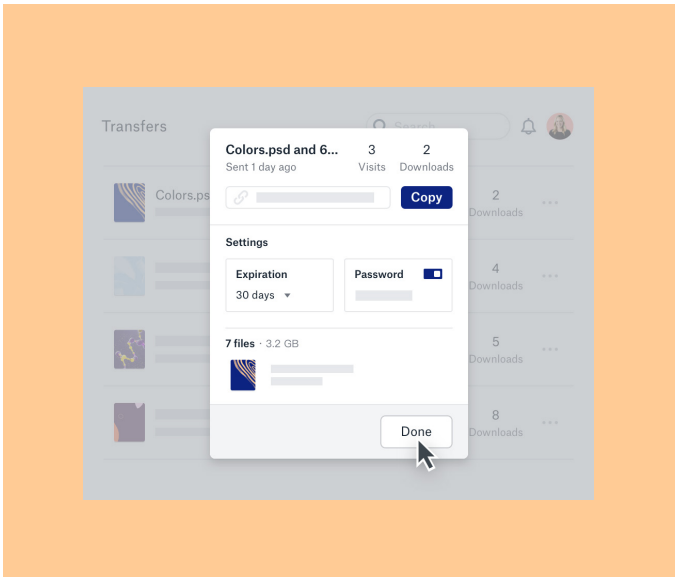

Dropbox HelloSign integration

Secure Transfer

Send and track your company's most important files and folders securely.

- Send up to 100GB of docs quickly, straight from Dropbox
- Transfer content to anyone, even if they don't have a Dropbox account
- Track analytics on views and downloads
- Set secure passwords and enable custom link expiry

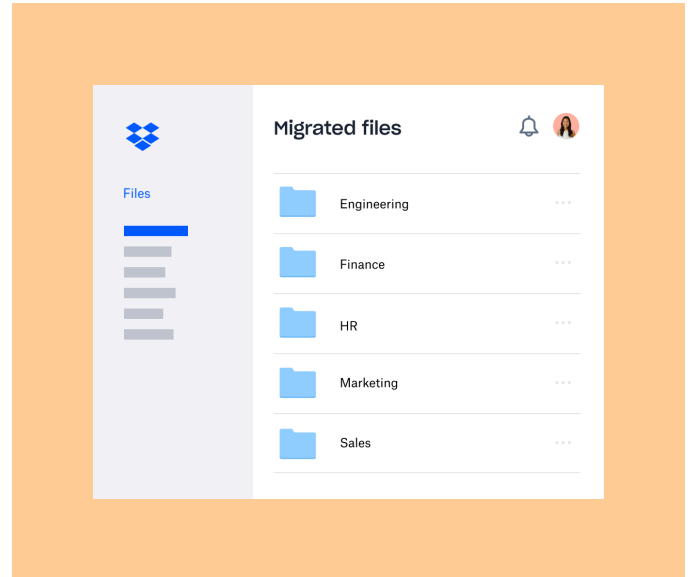

Secure Transfer analytics and security settings

Cloud FastPath Data Migration

Migrate your files and associated permissions from on-premise file servers and existing cloud storage solutions to Dropbox Business.

- Expedite migration with WAN optimization, parallel loading, and Dropbox API call optimization
- Analyze file server and cloud content and associated permissions based on file age, type, last modified, size, owner, and more to gain insight into data mapping pre-migration

Automated file migration

*10-year period begins the day you add EVH.

SERVCORP

“We wanted a system where we could manage authentication, control logins, determine who had access to which files, and allow our people to get to their files from multiple devices. Dropbox Business gives us all of it.”

Daniel Kukucka, CTO
