Product Features

We Design, Manufacture and Engineer Our Laptops

Unrivaled Mastery

We are the only major laptop manufacturer with the ability to write our own BIOS, develop, engineer, manufacture and extensively test laptops in-house to optimize system components found only on a Dynabook.

Multifactor Authentication

Face Recognition

An IR camera* supports Windows Hello™ with password-free, enterprise-grade secure authentication using face sign-in.

Fingerprint Reader

The Synaptics® SecurePad™ offers convenience without compromising security by replacing complex passwords with the touch of a finger.

*Smart Card Reader**

Harden security with an additional authentication factor by using physical cards with a built-in microprocessor.

Modern Standby

Allows the laptop to stay connected to Wi-Fi® and run background tasks while in standby mode. It will boost system wake times and is more energy efficient.

Thunderbolt™ 3

Delivering speeds up to 40Gbps, Thunderbolt 3 gives you the power to connect up to eight peripherals simultaneously, including three 4K displays.

MIL-STD-810G Strong

Featuring a premium Magnesium alloy casing and honeycomb reinforcement, this laptop has been tested using the MIL-STD-810G methodology for drops, vibration, shock, dust, altitude, temperature, humidity and solar radiation.
