

SMART REDACT

Instant, Accurate Redaction You Control

Smart Redact instantly surfaces sensitive data for removal, saving hours of manual work. You maintain complete control to review, adjust, and publish permanent, untraceable redactions with confidence.

SPEED

Identify and redact
sensitive data in seconds

Automate manual redaction workflows and free your team to focus on higher-value work with instant detection of over 30 categories of PII, including unstructured data that pattern-based tools miss.

CONTROL

Total visibility,
complete control

Every suggested redaction is quality-tested and grouped by category, giving you full visibility and the flexibility to add, adjust, or remove any redactions with ease.

TRUST

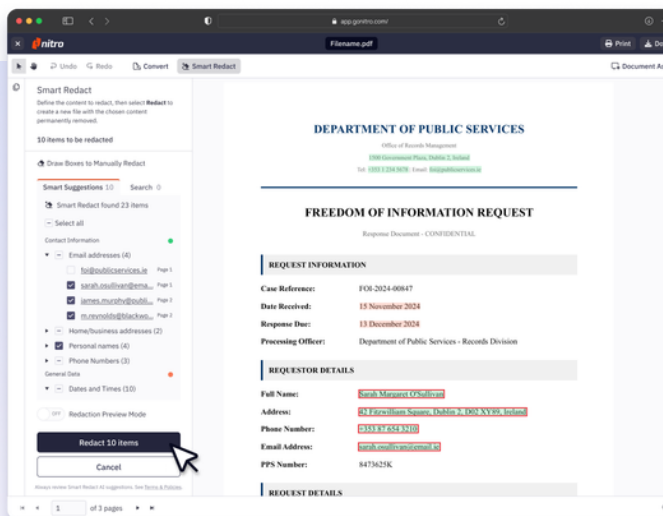

Built to meet the highest
security standards

Certified to the highest global security standards, every file is encrypted, stored temporarily during redaction, and each redaction permanently strips all visible and hidden data.
